Dentons Amsterdam MiCA Seminars

The Markets in Crypto Assets Regulation (MiCA) is a new piece of European Union legislation that has been dubbed the most significant crypto-specific regulation in the world.

Some of its rules take effect in July 2024 and others by January 2025. MiCA aims to create increased legal certainty for various crypto assets, and brings opportunities for payment and e-money institutions, VASPs, investment firms, investors and banks.

The Dentons Amsterdam MiCA team is ready to help you make sense of the more than 500 pages of legislation and distill what needs to be on your to-do list! Discover the changes and opportunities that MiCA will bring to your industry as we dive deep into all that is relevant during a captivating series of tailor-made MiCA seminars.

The inaugural seminar, designed exclusively for payment and e-money institutions, is taking place on **September 14, 2023**. We also have sessions lined up for VASPs (November 2023), investment firms (January 2024), investors (March 2024), and banks (May 2024).
