## Overview

Ashley Hamlett is a scientific advisor for Dentons' Intellectual Property and Technology practice focusing on patent prosecution and specializing in biotechnology.

Ashley's doctoral research was in the field of canine genetics and hereditary disease.

Her thesis work focused on the canine model of autosomal recessive hereditary nephropathy.

Ashley also has research experience in the fields of yeast genetics and food microbiology.

## Insights

- Co-author, "Genetic cause of autosomal recessive hereditary nephropathy in the English Cocker Spaniel," *Journal of Veterinary Internal Medicine*, 21: 394-401, 2007
- Co-author, "Isolation and characterization of canine Sertoli cells," *In Vitro Cellular & Developmental Biology*, 43(10): 324-327, 2007

## Activities and Affiliations

### Prior and Present Employment

Prior to joining Dentons, Ashley was a scientific advisor at Fulbright and Jaworski.

## Areas of focus

### Practices

- Intellectual Property and Technology

- Patents
- Inter Partes Reviews and Other Post-Grant Proceedings

## Industry sectors

- Biotechnology Companies
- Life Science Research Entities
- Life Sciences
- Life Sciences and Health Care

## Education

- Texas A&M University, 2007, PhD, Genetics
- New Mexico State University, 2003, BS, Animal Science, *summa cum laude*

## Admissions and qualifications

- US Patent and Trademark Office
