

Overview

The automotive industry in the US is growing and innovating. Those who want to lead the recovery must have the right intelligence and progressive flexibility. Dentons' US team is built to tackle challenges in automotive innovation and put our clients at the forefront of the industry's future.

Our experience in the US automotive sector spans a wide array of diverse yet interrelated areas, encompassing corporate and commercial transactions, dispute resolution, finance, intellectual property, real estate, tax, employment matters and government regulations. Our clients in these areas are involved at nearly every point in the auto industry spectrum, including manufacturing, design, distribution and supply, original equipment manufacture (OEM), retail, auto finance, fleet maintenance and logistics.

Located in 16 offices across the United States, our team is ready to address your issues, including:

- Analysis and consultation on automotive technologies
- Competition and other regulatory issues
- Commercial transactions
- Dealership distribution/franchising
- Dealership stock and other funding
- Divestiture and financing of automotive products
- Employment law
- Government relations
- Intellectual property issues
- Licensing and strategic alliances
- Litigation and disputes
- Mergers and acquisitions
- Product liability and end-user quality
- Restructuring, insolvency and bankruptcy
- Technologies, including automotive systems
