

Overview

Rely on our position as one of Bolivia's leading advisors on generation, transmission and distribution issues across the country. Our team participated both in the market liberalization of the energy sector, as well as in its re-nationalization a few decades later.

As a result of our participation in matters such as the drafting of the new electricity law, at the time of the market liberalization, we were involved in many of independent power producer projects developed in Bolivia and served as advisors to three of the five power generating companies as well as two transmission companies.

You can trust that we will put our experience to good use in supporting you in the electricity market, domestically and internationally.

Our key services include

- Energy market reform
- Regulatory
- Mergers and acquisitions
- Infrastructure for capacity growth, both thermal and hydro electric
- Project financing
- Environmental
- Supply and retail
- Transmission and Distribution
- Grid operations
- Arbitration and negotiation
