Module 1
Document Location, Data Modelling and Extraction

- Assistance with physically locating and digitising impacted documents
- Our global network of specialist finance lawyers will assist with the review and build of data models for bespoke legal documentation
- Through the use of DocIntel, we will provide front to back support of documentation lifecycle management and perform automated document data extraction using AI

Module 2
Templates and Playbook

- Our lawyers will work with you to prepare template remediation documents (including notices, amendment agreements, resolutions, side letters or otherwise) for all impacted documents
- Detailed negotiation playbooks will be prepared containing clause explanations and alternative fullback clauses

OUR APPROACH

Module 4
Contract Negotiation

- Our lawyers will respond to counterparty questions and will negotiate terms of all remediation documentation
- A Dentons legal project manager will be in place to escalate to in-house legal/project teams where required
- Periodic chasing of unresponsive counterparties

Module 3
Document Generation and Outreach

- Through the use of our proprietary document generation and outreach tool we will contact all impacted clients with the relevant remediation documents
- We will perform mail box management, outreach workflow and issue management
- Detailed management information reports (tailored to clients specific requirements) made available on real-time basis
