

Forest Products and Agribusiness in the United States

Overview

The forestry products and agribusiness industries are important sectors of the US economy. New technologies are being developed to ensure adequate timber and food supplies. Escalating energy and input prices affect these sectors, while retrenchment and consolidation are some of the other issues these industries face.

Whatever your focus in the timber, food and agriculture industries, including government policy, patents, intellectual property procurement and counseling, technology licensing, litigation, regulation, mergers and acquisitions, we can collaborate with you to support your legal and business goals. Confidently develop and manage your business with a proven world leader.

Draw on our extensive experience assisting clients before courts, patent offices and other government agencies nationwide. Look to our lawyers for innovative business and legal solutions in the forest products and agribusiness industries, including:

- Biotechnology, crop and plant breeding, protection, fertilizer and fiber R&D
- Production
- Lumber trade
- Land protection trusts and timber land investment
- Pulp, paper, newsprint, tissue and containerboard distribution
- Biofuels and energy input management
- Strategic advice and industry consolidation implementation
