

# Infrastructure and PPP in Russia, CIS and the Caucasus

## Overview

Due to the complex nature of the infrastructure market in Russia, CIS and the Caucasus countries, you can benefit from reliable counsel to maximize the success of your investments.

The essence of PPP, a flexible financing tool, is risk allocation—the success of your operations mainly depends on how risk is identified, managed and priced. As contracts are increasingly complicated and risk allocation sophisticated, our experienced multijurisdictional team is here to guide you.

With more than 30 years' experience in Russia, CIS and the Caucasus countries, we know the law, the business environment, and the political decision centers. In particular, our experience in Russia predates the adoption of the 2005 Law on Concession. We have advised consortia, governmental bodies and lenders on projects across the entire infrastructure landscape, including PPPs, concessions and other types of operation and maintenance arrangements.

Dentons' lasting experience and thorough understanding of the legal and business realities will deliver the guidance you need in this challenging environment to bring your projects to fruition.

Key areas include:

- Transport
  - Roads, bridges, bypasses and tunnels
  - Railways, light rail, metro
  - Seaports
