

Overview

We have a team of lawyers with deep experience in many areas of insurance law related to construction, and the ability to draw upon a wealth of knowledge in insurance law globally.

We provide broad coverage for your legal insurance needs, including the drafting of policy language, provision of coverage opinions, coverage dispute advice, and acting in the role of legal defense counsel for you and your Insureds.

You will benefit from our approach of keeping current with Insurance Industry trends, and changes in the law. We seek to visit our insurance clients regularly in order to get to know and understand better the kinds of coverages they provide to the marketplace.

We work with you to establish Resolution Plans and Litigation Budgets early on in the defense of a claim. We report in a timely way throughout the history of a claim and we lean heavily on alternative dispute resolution tools such as mediation, to promote a cost-effective and early closure of a claim.

We also provide advice to sureties who provide bonding and surety coverage on all types of projects. Our team of lawyers works with claims handlers, and occasionally involves our insolvency experts, to insure that the surety's risk on the project is minimized and the project is completed with minimal disruption.
