

Affordable Care Act Implementation (United States)

Overview

For the foreseeable future, the US health care delivery and financing systems will undergo enormous change as they implement the many provisions of the Affordable Care Act (ACA). Those changes will impact hospitals, physicians, health plans, patients, employers, pharmacies and others.

Dentons' US Health Care practice group has been involved in the ACA since its conceptualization. We counsel healthcare providers, payors, service providers, employers, exchanges, and service providers on not only what the ACA requires, but also on how those requirements can be integrated into their business plans and operations.

Dentons' US Health Care practice group includes former senior federal health care officials and lawyers and other professionals with deep knowledge and experience in the range of issues implicated by the ACA. Importantly, our team enjoys exceptional relations with senior policy makers in the most important government agencies.

Working seamlessly with our colleagues in Dentons' Insurance Regulatory, Employee Benefits, Tax, and Public Policy & Regulation groups, the US Health Care practice group efficiently and effectively provides the counsel required for our clients to achieve their business objectives.
