

# Life Sciences and Health Care in the United States

## Overview

Whether viewed nationally or globally, companies operating in the US life sciences and health care industry face staggering competition, complexity and regulation. Whether you are a startup biotechnology or medical device company, an established pharmaceutical manufacturer, a small physician practice, or the world's largest and most prominent for-profit or nonprofit health care organization—you can look to our lawyers and professionals to address your challenges and help you capitalize on opportunities.

Dentons' Life Sciences and Health Care team can support your legal, consulting, public policy and other professional services needs. Consistent with the complexity and diversity of the industry, our team includes a deep bench of health care regulatory lawyers, former senior officials from CMS, HHS-OIG, DOJ and other federal and state agencies, corporate and securities dealmakers and financing specialists, consultants specializing in clinical research, superb patent lawyers and professionals, professionals skilled in investigations and compliance, and a deep bench of trial lawyers with experience in multiple jurisdictions who are adept at handling complex matters for your life sciences and health care company.

As your partner we will represent you in connection with establishing and enforcing intellectual property rights, corporate and FDA matters, as well as in litigation and strategic issues management. We frequently team with Dentons lawyers from diverse areas such as finance and corporate law, to assist Boards of Directors with corporate governance, both in the US and elsewhere and to provide representations in substantial public offerings, commercial transactions, and mergers and acquisitions in the industry.

Our registered patent attorneys including many with advanced degrees in scientific disciplines relating to chemistry, pharmaceutical science and biotechnology understand the obstacles you face especially as they relate to advanced technology, public policy and business development concerns. Our team will counsel you on areas such as disclosure requirements, protecting intellectual property and assets, licensing technology, resolving disputes and managing corporate reputation. We will collaborate with you in addressing sophisticated issues in bio-informatics and related technology merging high-tech and life sciences concepts.

We're here to help you strategically with an integrated approach to handling fraud and abuse and compliance, from the investigation stage to the courtroom, if necessary. Our litigation team is well versed in the industry and in complex litigation, including commercial disputes, pricing litigation, product liability and mass tort claims, Foreign Corrupt Practices Act claims, patent and trademark disputes, employment and ERISA issues, alleged antitrust and competition law violations, and class actions. You can count on Dentons' Life Sciences and Health Care team.
