## Indonesia Desk in Singapore

Our Indonesia desk provides comprehensive legal advice and support services to clients investing in Indonesia, and to clients looking for investment opportunities in Singapore and the region as a whole.

Working with clients in a wide range of industries—including oil and gas, petrochemicals, power, telecommunications and technology, mining, airports, utilities, water, rail, paper and real estate—our team is particularly experienced in project finance, corporate restructuring, mergers and acquisitions, infrastructure projects and banking and investment transactions.

We have a deep understanding of all the commercial issues involved in trade and commodity finance activities. From structuring the project at its inception to guiding it through to commercial operation, our lawyers can counsel parties throughout the commodity trade value chain. Our experience also includes advising on procuring financing and refinancing, negotiating financing, security and project documentation, managing performance risks. We also can guide you on using credit enhancements to improve structural credit and to shift counterparty risks.

We frequently counsel clients on multijurisdictional intellectual property

## Key contacts
