

## Dutch Desk in London

Dentons has a long history of supporting international clients doing business in the Netherlands – and Dutch clients doing business abroad.

The Netherlands is the sixth largest economy in the European Union and a global financial centre. As the fifth largest exporter of goods in the world and a major European transportation hub, it is also a centre for international trade. Due to its business-friendly climate and favourable tax regime, the Netherlands is an attractive location for corporate headquarters and for structuring international transactions.

Today, international clients doing business in the Netherlands can benefit from our 70+ Dutch lawyers in our Amsterdam office. Dutch clients doing business abroad can benefit from the 8000+ Dentons lawyers around the globe.

Jan Willem van den Bos is your bilingual, prime UK contact. He is based in the financial and business hub of London, but can also regularly be found in the Netherlands.
