

Dentons artificial intelligence (AI) survey

September 1, 2021

Digitalization is disrupting business across all industry sectors, and artificial intelligence (AI) is inevitably a key component in the digital transformation journey. AI is one of the most transformative technologies that we have ever experienced. It has become part of our everyday life, even if sometimes we may not notice it.

Yet the deployment of AI continues to raise legal and ethical questions that institutions are struggling to solve, with a continuous effort to regulate without over-regulating.

To gain deeper insight into AI issues and opportunities, and to understand business readiness for AI transformation, we invite you to complete our global **AI Survey**.

[Click here to access the survey](#)

The survey contains 20 questions that should take you no more than 10 minutes to answer. It is addressed to our clients, C-level executives, general counsels and legal, IT and compliance advisors. The survey is anonymous: we will publish only aggregated results, which cannot be attributed to any individual respondent.

We will analyze and share the results as part of our AI whitepaper, which will be published in autumn 2021 and made publicly available.

The survey is open until **September 17, 2021** inclusive.

If you have questions about the survey, please contact Daria Nazarova.
