

# "Ontario Feed-In-Tariff 2.0 Released", Focus on Energy, March 2012

March 22, 2012

The results of the much anticipated review of the Ontario Feed-in-Tariff Program (the "**FIT Program**") were released today (the "**Review Report**").

The FIT Program, North America's first comprehensive renewable energy feed-in-tariff regime was enabled by the *Green Energy and Green Economy Act* (Ontario) in 2009 and began accepting applications in October 2009. Since that time, the Ontario Power Authority (the "**OPA**") has received over 10,000 applications for power purchase agreements under the program (each a "**FIT Contract**") and gone on to execute FIT Contracts representing over 4,600 MW of renewable energy capacity.
