

# Global Energy Game Changers - Focus on the Americas

April 12, 2016

The global energy sector is undergoing a dramatic transformation. Advanced technologies, distributed networks and new regulations in nearly every subsector have strangled yesterday's business models. Foundational elements throughout the industry, including energy transfer and storage, have seen massive disruption. At the same time, price fluctuations, volatile consumer demand and cyber and physical security concerns continue to add to an unpredictable future.

Nevertheless, opportunity abounds, and that is why we are excited to present to you the newest edition of our Global Energy Game Changers series, a compendium of important issues presented to you by Dentons' Global Energy group. Our Spring 2016 issue is focused specifically on the Americas. From energy extraction in upper Canada, cross-border renewable programs between the US and Canada, new opportunities in Mexico's ever-changing oil and gas sector, and other changes and opportunities across the Americas, we take an in-depth look into the issues shaping the business environment in one of the world's most important energy regions:

- Quantum Viewpoints: Trends and Projections for the Energy Industry
- A US perspective on the global energy landscape—game changers for 2016 and beyond
- Opportunities for climate and energy cooperation between the US and Canada
- The Paris puzzle for oil and gas after COP21
- Mexico oil and gas industry: open for all
- Mexico's green energy puzzle

- US energy and environmental policy: wait and see in 2016?
- A boost for energy development on tribal lands is on hold with the broad energy policy reform in Congress
- Moving toward an integrated approach for grid security

Rely on Dentons' Global Energy group, situated in nearly every important energy hub across the world, to help you navigate local challenges while supporting your global objectives.
