

# Dentons Flashpoint

## Daily Global Situation Report

October 16, 2020

# Global Situation Update: October 16, 2020

---

## KEY TAKEAWAYS

A WHO trial of remdesivir and hydroxychloroquine found that the drugs had little impact on mortality in COVID-19 patients.

Fighting between Armenian and Azeri forces intensified on Friday, defying hopes of ending nearly three weeks of fighting over Nagorno-Karabakh.

Economic recovery in Europe and the US shows more signs of stalling.

*Note: This report is based on sources and information deemed to be true and reliable, but Dentons makes no representations to same.*

# Global

---

**Overnight, confirmed coronavirus cases rose to 39,229,001 in 214 countries and territories, with 1,103,719 deaths; yesterday saw a record global number of new cases: 475,279.**

- A WHO **clinical trial** of remdesivir found that the drug has little impact on a COVID-19 patient's chance of survival; the study also found hydroxychloroquine, lopinavir and interferon regimens had little impact on mortality.
- A top WHO scientist suggested that young, healthy people may need to wait until 2022 for a **vaccine**.
- **Pre-clinical trials** show promising results for the vaccine candidate from France's Sanofi and the US' Translate Bio.
- The IMF urged China and the US to increase stimulus to drive **economic recovery**.
- UN Children's Fund says 3 billion people **lack hand-washing facilities** at home.

*Note: This report is based on sources and information deemed to be true and reliable, but Dentons makes no representations to same.*

# Markets

---

**OKEx, a Malta-based exchange and one of the world's biggest cryptocurrency exchanges, has halted withdrawals after revealing it has lost contact with an employee who is “*co-operating*” in a government investigation.**

- On Friday, **European equities** regained some ground after a sharp sell-off in the previous session.
- **Asia-Pacific equities** retreated on Friday.
- **US stocks** fell Thursday on signs of rising COVID-19 cases.
- Bloomberg reported that nearly 2,000 Robinhood accounts were infiltrated by hackers who siphoned off funds.
- Vertex shares plummeted after the biotech company dropped an initially promising **experimental drug**.
- The US Commodity Futures Trading Commission established position limits on 16 **agricultural, metal and energy commodities** to prevent speculators from causing price swings.

*Note: This report is based on sources and information deemed to be true and reliable, but Dentons makes no representations to same.*

# Business

---

**The US Justice Department charged software billionaire Robert Brockman with tax evasion for hiding \$2bn from the government in the largest case of its kind against a US citizen.**

- **United Airlines** began offering pre-flight testing for travelers to Hawaii.
- UK pharmacy chain **Boots** saw same-store sales drop 23 percent in the three months ending in August.
- More than 150 businesses and nonprofit groups, including the US Chamber of Commerce, urged President Trump to withdraw his executive order **limiting diversity training**.
- **Petrochemical makers** are delaying investment in new US plastics plants as profitability drops.
- **Panasonic** will boost production of air purifiers by 200 percent.
- Uniqlo parent **Fast Retailing** said it expects record-breaking earnings in the fiscal year ending in August 2021.
- **Taiwan Semiconductor Manufacturing Co.** expects a 30 percent jump in revenue this year thanks to pandemic technology demand.
- **YouTube** said it was banning content using conspiracy theories that “*have been used to justify real-world violence*,” including QAnon.
- Sanjeev Gupta’s **Liberty House** has tabled a bid to buy the lossmaking steel operations of Germany’s **Thyssenkrupp**.
- **Morgan Stanley’s** Q3 profits rose 25 percent y/y.

*Note: This report is based on sources and information deemed to be true and reliable, but Dentons makes no representations to same.*

# Africa

---

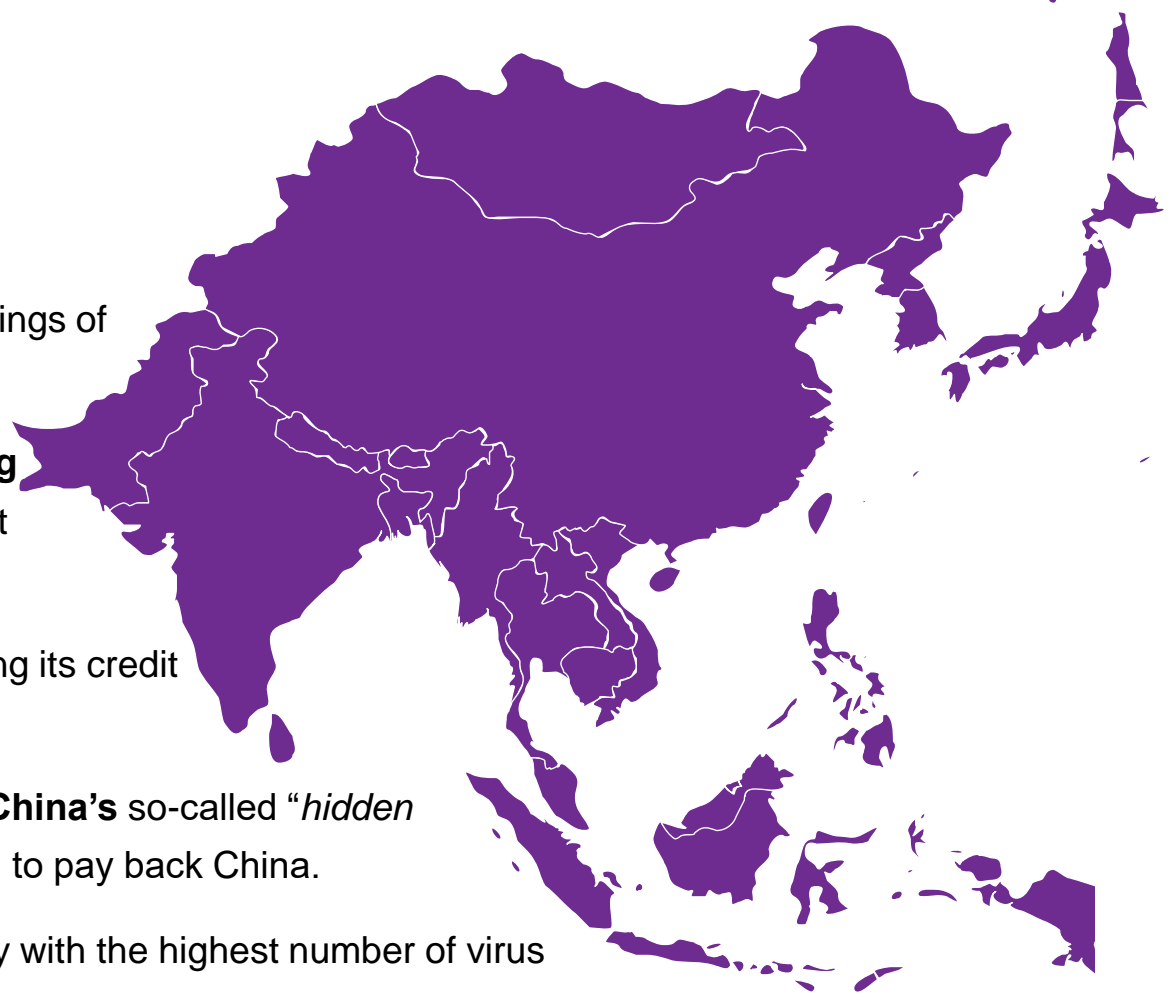

- **Nigeria's** army said it was ready to step in to maintain law and order after days of protests against police violence; hundreds of protestors marched to the gates of the country's parliament even after the threat.
- The **Ivorian** presidential campaign period officially began; opposition leaders are calling for civil disobedience and a boycott due to the controversial third-term run of Pres. Ouattara.
- **South Africa** extended its national state of disaster by another month.
- The **Zimbabwean** government agreed to raise civil service salaries after a teacher strike.
- The UN called on **Guinean** presidential candidates to avoid hate speech and invoking ethnic divisions ahead of a divisive election.
- Foreign lawyers for 'Hotel **Rwanda**' hero Paul Rusesabagina said they have been denied access to him.
- **Tanzania** sent in a helicopter to help fight fires on Mt. Kilimanjaro.

*Note: This report is based on sources and information deemed to be true and reliable, but Dentons makes no representations to same.*

# Asia

- **Thailand's** government issued an emergency degree banning gatherings of over five people after massive protests in Bangkok.
- The Asian Development Bank (ABD) predicted that **Asian developing economies** face a 0.7 percent economy contraction this year, the first regional recession in over 50 years.
- The China-led **Asian Infrastructure Investment Bank** (AIIB) is seeing its credit risk increase significantly as the pandemic increases bad loans.
- The G20's debt relief plans are being challenged by concerns about **China's** so-called "*hidden loans*," as global financial leaders worry that relief money will be used to pay back China.
- **Indonesia** surpassed the **Philippines** as the Southeast Asian country with the highest number of virus cases. **India** reported a record number of new cases: 131,079 infections and 1,575 deaths.
- Qingdao, the **Chinese** city that recently saw a quickly-contained outbreak, suspended the head of its health commission and fired a director at the hospital the outbreak centered from. Some Chinese cities are seeking access to experimental Covid-19 vaccines, as China expands an emergency use program that has already administered hundreds of thousands of doses

*Note: This report is based on sources and information deemed to be true and reliable, but Dentons makes no representations to same.*

# Europe

- The recent rebound in **eurozone** exports has stalled, after rising in August by the smallest monthly amount since the coronavirus pandemic hit.
- The **French** government will spend a further €1bn to compensate businesses hurt by the curfew.
- **UK** PM Johnson is expected to attempt to force **Brexit** talks with a no-deal ultimatum.
- Hopes for a **Nagorno-Karabakh** ceasefire fell further as the conflict's death toll rose.
- **European Commission** President von der Leyen left an EU leaders summit after coming into contact with a confirmed COVID-19 case. **Greece** placed the northern coal-mining region of Kozani under a two-week lockdown. **France** reported a record case rise of over 30,000 infections, with total infections topping 800,000. **Poland's** PM Morawiecki is in self-isolation after encountering a COVID-19 case. Greater Manchester refused to comply with the **UK's** new lockdown measures, challenging PM Johnson's regional restriction plans. Scotland plans to introduce a tiered lockdown system similar to England's. Alcohol will be banned from the House of Commons as London enters tier 2 lockdown restrictions this weekend. Yesterday, the UK reported almost 19,000 new infections. Passengers from **Italy** have been added to the UK quarantine list. **Russia** will implement a QR code system at night clubs to aid contact tracing. **Netherlands** topped 200,000 confirmed virus cases.

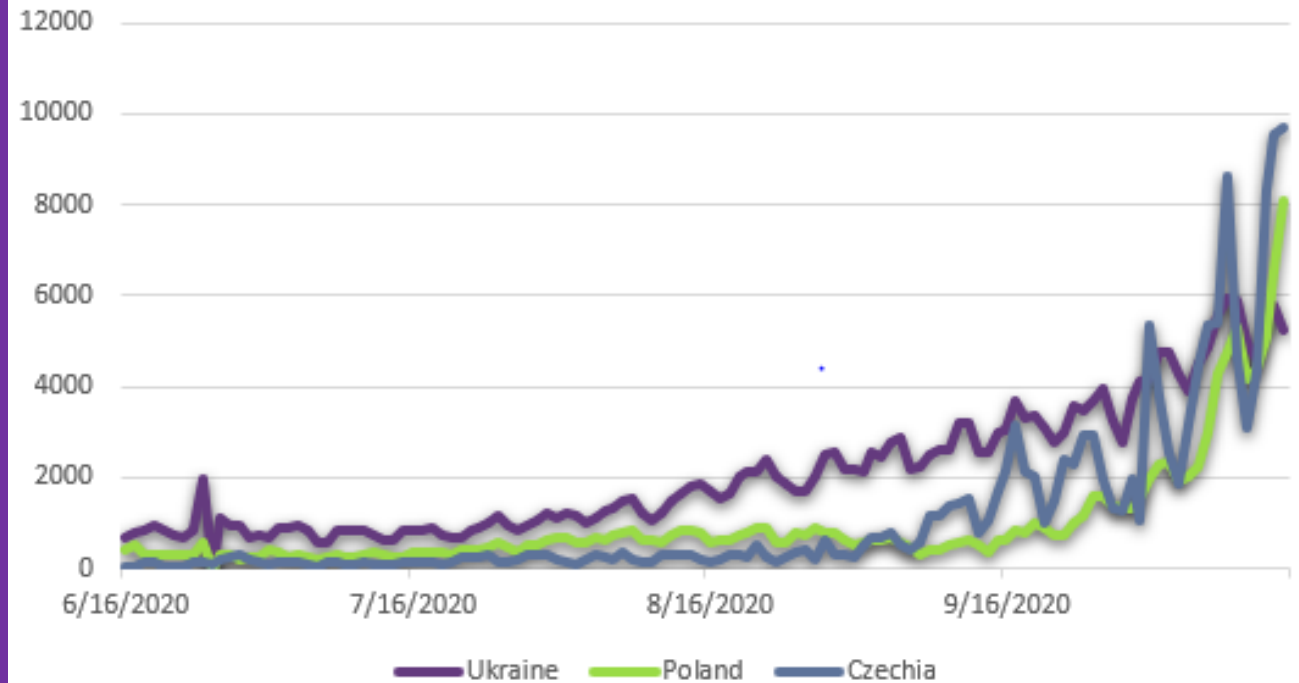

*Note: This report is based on sources and information deemed to be true and reliable, but Dentons makes no representations to same.*

# Europe

Poland reported 8,999 new coronavirus cases yesterday and record death tolls over the past two days. The Polish government has imposed new restrictions, including limits on public gatherings, shorted hours for operation of restaurants, and on-line school. Czechia, which has one of the fastest rate of new cases in Europe, reported 9,720 new cases yesterday. Almost half of the country's 149,016 cases have been reported in the last two weeks. Ukraine also recorded a record number of new cases yesterday, almost 6,000. Ukraine is negotiating with Pfizer, Moderna, AstraZeneca and Sinovac for vaccines, having rejected the Russian vaccines for not having passed phase 3 trials.

*Note: This report is based on sources and information deemed to be true and reliable, but Dentons makes no representations to same.*

# Middle East

---

- **Iran** reported several cyber-attacks against two governmental departments.
- The **Lebanese** government set new, lower withdrawal limits for local currency.
- A municipal **Tunisian** police chief was dismissed following days of protests over the death of a homeless man during the destruction of an illegal shelter. Tunisia's Ennahda party announced that its leader, Ghannouchi, would run for the presidency.
- **Israel** surpassed 300,000 confirmed coronavirus infections.

*Note: This report is based on sources and information deemed to be true and reliable, but Dentons makes no representations to same.*

# Americas

---

- Amid the pandemic, child labor is increasing across **Latin America**.
- **China's** ambassador to **Canada** warned the country against granting asylum to **Hong Kong** protestors. Ottawa researchers report alarmingly high levels of coronavirus in wastewater samples.
- **Argentina** faces fresh economic challenges as the country's central bank is running out of dollars for basic foreign exchange transactions.
- Ricardo Salinas Pliego, a wealth adviser to **Mexico's** President Lopez Obrador, tested positive for COVID-19.
- **Nicaragua's** National Assembly approved a highly controversial law that would allow the government to monitor people, businesses and organizations that receive foreign funding.
- A **Brazilian** lawmaker and Bolsonaro ally stepped down after police found cash in his house and in his underwear during an investigation into stolen COVID-19 funds.
- The UN envoy for **Colombia** called for better protection of former combatants, who are being killed in “*alarming*” numbers.

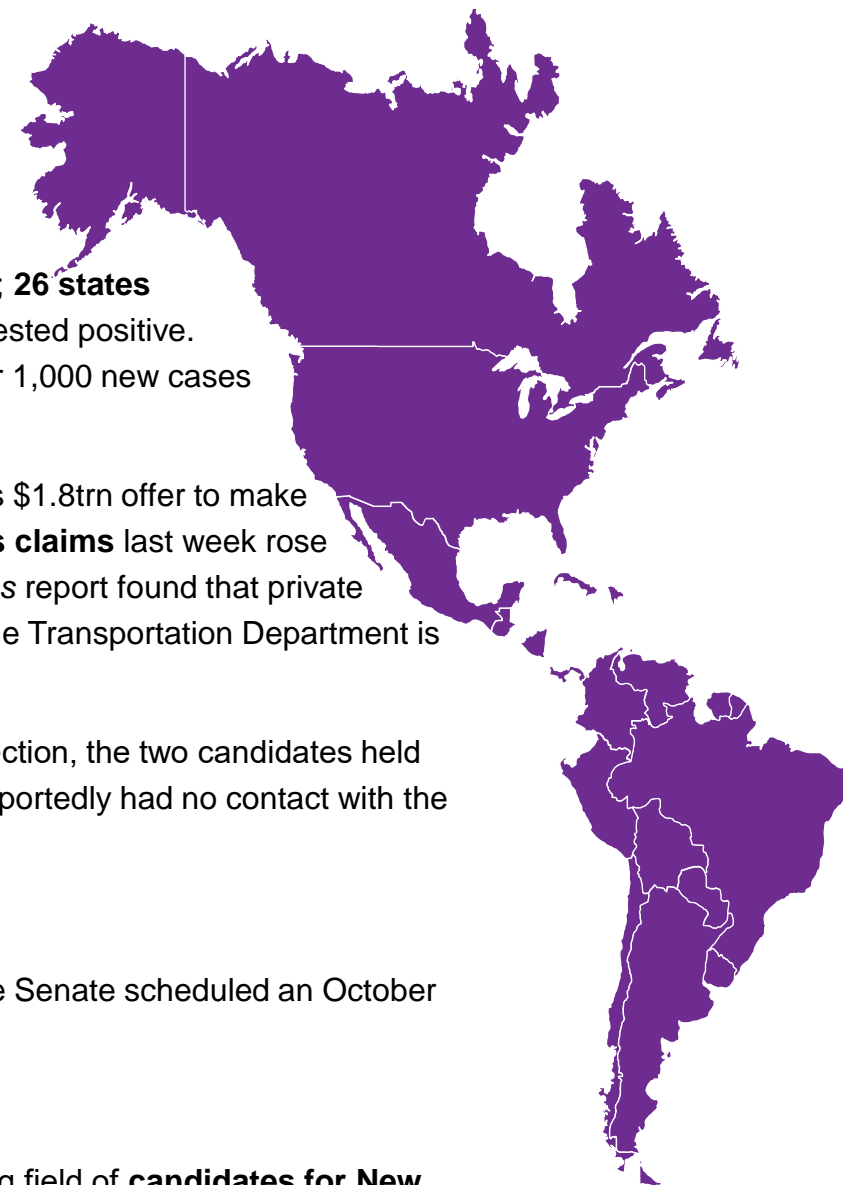

*Note: This report is based on sources and information deemed to be true and reliable, but Dentons makes no representations to same.*

# Americas: US

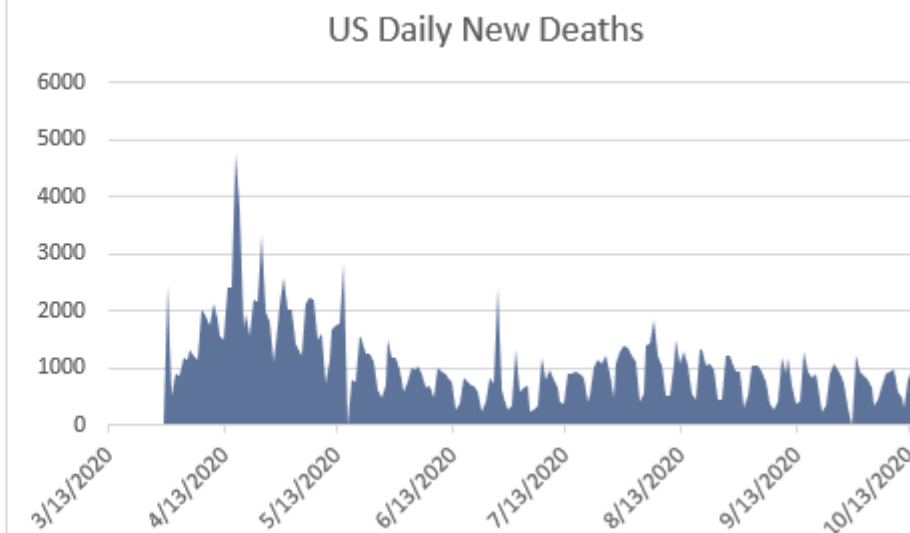

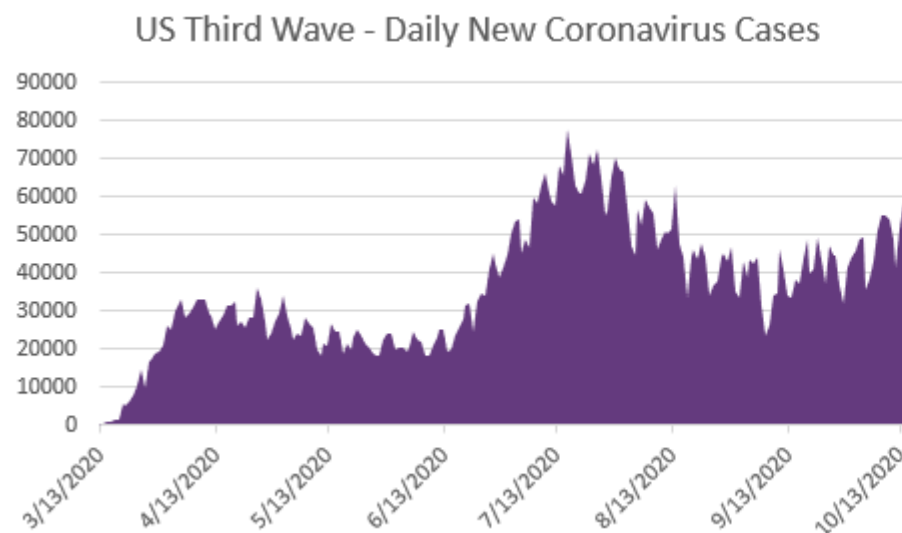

- The US reported almost **63,000 coronavirus cases** on Thursday, its biggest one-day jump since July; **26 states** reported over 1,000 new cases. **Wisconsin** reported another record jump in cases, as 3,747 people tested positive. **North Carolina** also reported a record daily case rise of 2,532. Former hotspot **Arizona** reported over 1,000 new cases for the first time in a month. **Hawaii** reopened for tourism.
- The President again reversed himself on **coronavirus aid**, calling for Treasury Sec. Mnuchin to up his \$1.8trn offer to make a deal, while Sen. Maj. Leader McConnell (R-KY) said he would not accept a larger bill. **Initial jobless claims** last week rose unexpectedly to 898,000 amid continued concerns that the labor market has stalled. A *New York Times* report found that private briefings from White House economic advisors for political donors sparked an **early stock sell-off**. The Transportation Department is pushing to exclude previously designated “*anarchist jurisdictions*” from **stimulus money**.
- After the cancellation of tonight’s planned **Presidential debate** due to the President’s coronavirus infection, the two candidates held simultaneous **town halls**. Two people involved in Biden’s campaign **tested positive**, although they reportedly had no contact with the candidate; as a precaution, Harris canceled all travel through Tuesday.
- Freshman enrollment dropped 16 percent at **US colleges** this year.
- The fourth and final day of Amy Coney Barrett’s **Supreme Court** confirmation hearings concluded; the Senate scheduled an October 22 vote over Democrats’ protests.
- Healthcare data shows that COVID-19 outbreaks led to a **delay in important cancer screenings**.
- Ray McGuire, one of Wall Street’s most prominent Black bankers, will leave Citigroup to join a growing field of **candidates for New York City mayor**.

*Note: This report is based on sources and information deemed to be true and reliable, but Dentons makes no representations to same.*

# Americas: US

The rate of new coronavirus infections in the US is picking up, with a third wave now evident, driven by continuing hotspots of Texas, California and Florida and new hotspots in Illinois, Wisconsin, North Carolina and Missouri.

# Social Unrest Across Latin America Over the Past Two Months

By Scott Muir

***Latin America and the Caribbean will suffer the worst economic and health impacts from the coronavirus of all major regions of the world, according to a recent study from the World Bank. Interestingly, however, long-standing problems that predate the arrival of the virus remain the focus of a majority of incidents of social unrest across Latin America over the past 60 days.***

Pervasive and unresolved issues in the region such as excessive use of force by police, high crime rates and the rights of labor and indigenous peoples, were more common sources of public anger since August than the handling of the coronavirus by governments. Occasional isolated protests against official COVID-19 counter-measures across Latin America may become more widespread and sustained if governments do not make concessions to local community groups and labor and trade unions as COVID-19 cases continue to surge across the region and national GDP forecasts plummet. The following is a broad review of protest hotspots across Latin America over the past sixty days.

*Note: This report is based on sources and information deemed to be true and reliable, but Dentons makes no representations to same.*

## Mexico

Mexico has remained a top global hotspot for coronavirus infections over the past two months. The Mexican government announced this week that there are now approximately 830,000 cases and almost 85,000 deaths in the country, one of the highest tolls in the world. The actual count is likely even higher. However, recent incidents of protests, riots and strikes continue to be driven more by the grievances of labor unions and public frustration with federal and local governments over high crime rates, rather than anger at mismanagement of the coronavirus pandemic.

To be sure, there are occasional outbursts of dissatisfaction with COVID-19 policies undertaken by President López Obrador, such as from protesters who camped out in downtown Mexico City last month calling for his resignation, who drew widespread media attention. However, the encampment has now broken up as protestors went home to return to work and school.

More persistent than coronavirus-related protests are demands for better working conditions and wages from unionized taxi drivers

# Social Unrest Across Latin America Over the Past Two Months

teachers, and utility professionals who block roads and gather outside government buildings to call attention to their plight. Local demonstrations can be expected to persist across the country as official budgets shrink due to reduced revenue as a result of coronavirus and the demands of labor go unmet.

## South America

Colombia has witnessed more protests, riots and strikes than any other South America nation over the past sixty days. A recent spike in coronavirus cases, which makes Colombia the sixth most infected nation worldwide, is not the primary driver of social unrest, however. Instead, recent civil disobedience has focused on rampant excessive use of force by police against citizens, demands for better protections of indigenous peoples by activists and students, and even the toppling of statues of Spanish conquistadors deemed as racist. As elsewhere, these issues are not directly tied to the government's success in combatting coronavirus and thus should be expected to persist well into the future.

In Argentina, which is home to the fifth most coronavirus cases in the world, several recent protests were directly related to the handling of the pandemic by authorities. In Buenos Aires, merchants have

demonstrated against the extension of quarantine imposed by the government, while earlier, in mid-August, thousands of Argentinians gathered in the capital city to protest the management of the virus by President Fernández. Recently, however, there are more protests against proposed judicial reforms than in opposition to COVID-19 measures.

Chile, the richest country in South America, remains a hotbed of civil unrest in the lead up to a referendum scheduled for Oct. 25 that may clear the way for a re-write of the country's constitution. For the past three Fridays, Chileans have taken to the streets of Santiago to demonstrate against the government, inequality and police brutality. COVID-19 is less a focus of recent protests in Chile regardless of the fact that the country now has more coronavirus cases than Italy and Germany, despite a much smaller population. Demonstrations, peaceful and violent, can be expected to escalate over the next few weeks as the country makes important political decisions about its future.

Elsewhere in South America, Brazil has witnessed an overall decrease in the number of social unrest incidents since August as emergency aid payments to much of the populace have helped Pres. Bolsonaro win support despite the virus spreading. This situation

*Note: This report is based on sources and information deemed to be true and reliable, but Dentons makes no representations to same.*

# Social Unrest Across Latin America Over the Past Two Months

could change soon, though, as Brazil currently has the third most infections worldwide, and healthcare workers in several cities have recently launched indefinite strikes against unpaid wages from overtime hours. In neighboring Venezuela, recent protests have focused on demands for better public services, fuel shortages and power outages. COVID-19 may be an amplifier for many problems, but it is not at the root of Venezuela's ongoing crisis.

## Central America

Costa Rica is the Central American country with the highest number of recorded social unrest incidents since the summer. The U.S. Embassy in San José released a security alert last week indicating that government measures to address economic problems related to COVID-19 are behind recent instability. Costa Rican authorities have arrested dozens of protestors who rallied against tax increases, the suspension of social benefits, and a reduction of labor hours due to the virus. Roadblocks have sprung up across the country in a rejection of a government proposal to negotiate an agreement with the IMF, which has called for temporary tax increases rather than reducing spending. Costa Rican President Alvarado announced plans for a national dialogue, but protests should be expected to continue if there is no repeal of proposed austerity measures.

Elsewhere in Central America, protests are more isolated and sporadic. In Panama, unionized labor in the airline and construction sectors have recently demonstrated against poor working conditions, while in El Salvador, municipal workers have been protesting against lack of pay for several months, likely the result of reduced budgets due to economic fallout from COVID-19. Meanwhile, in neighboring Honduras, riot police officers last month fired teargas to disperse people rallying to protest the government's handling of the COVID-19 pandemic. The Central American region could face greater social unrest in the near future if job losses become more common.

## Caribbean

In the Caribbean region, Spanish-speaking countries continue to see the fewest amount of protests. Over the past two weeks, workers in Dominican Republic have demonstrated to demand the approval of a bill that would grant them a payout of a portion of their savings funds to help mitigate losses due to the coronavirus. In Francophone countries and territories such as Guadeloupe, Haiti and Martinique, healthcare workers have recently protested against overdue back wages as well excessive use of force by local police. Lockdowns are now easing on many islands in an effort to bring back tourism-related jobs, and if these measures are successful, the Caribbean could turn out to be one of the most peaceful areas in the region.
