The graphic features a dark blue background with a subtle geometric pattern. On the left is a white-bordered box containing the text 'IOWA TECH POLICY PODCAST'. To the right, a white play button icon is followed by the title 'CYBERSECURITY POLICY AND PROTECTING IOWA'. Below this, two rows of information are presented. The first row includes a portrait of Sen. Zach Nunn, his name in large white letters, and his title 'Iowa State Senator, District 15'. The second row includes a portrait of Stephan Thomasee, his name in large white letters, and his title 'Senior Vice President & Chief Technology Officer, SHAZAM'.

Listen now

In the third episode, Brian Waller discusses cybersecurity issues that Iowa municipalities and businesses face with Iowa State Senator Zach Nunn. Following that discussion, Mollie Ross talks with SHAZAM's SVP and CTO, Stephan Thomasee about cybersecurity risk and the career opportunities for cybersecurity professionals.

The Davis Brown Cybersecurity Team works with companies of all sizes and industries from small retailers to international manufacturers. The team is comprised of employment, health, and business attorneys who bring together their knowledge to help companies navigate the intersection of cybersecurity architecture and compliance. They interpret the regulations for business leaders and technology teams to ensure systems are performing compliantly and in cases of breaches, guide companies through notifications and messaging, penalties, and preventing future risk.
