

Dentons Flashpoint

Daily Global Situation Report

January 20, 2021

Global Situation Update: January 20, 2021

KEY TAKEAWAYS

US President-elect Biden will be inaugurated today.

The US determined that China's repression of Uighurs in Xinjiang is genocide.

India will provide domestically made vaccines for free to Bhutan, the Maldives, Bangladesh, Nepal, Myanmar, and Seychelles.

Note: This report is based on sources and information deemed to be true and reliable, but Dentons makes no representations to same.

Global

The CEO of London 2012 Olympics said the Tokyo Games are unlikely to take place.

- Confirmed coronavirus cases across the globe surpassed **96 million with 2.1 million deaths**. More than 93,000 people died from coronavirus in the past week, a record high since the start of the pandemic. Global vaccinations rose to **46.4 million**, although some regions continue not to report vaccination statistics.
- The coronavirus pandemic is undermining efforts to improve diets and nutrition of nearly 2 billion people in Asia-Pacific nations who were already unable to afford **healthy diets**, according to the UN Food and Agriculture Organization and WHO.
- According to a new study, the human immune system remembers how to make **antibodies** that can fend off the new coronavirus for at least six months after the initial infection, able to fight against reinfection.
- A cheap, off-patent antiparasitic drug ivermectin has been shown to have a significant effect in reducing **mortality** in patients with moderate to severe Covid-19.

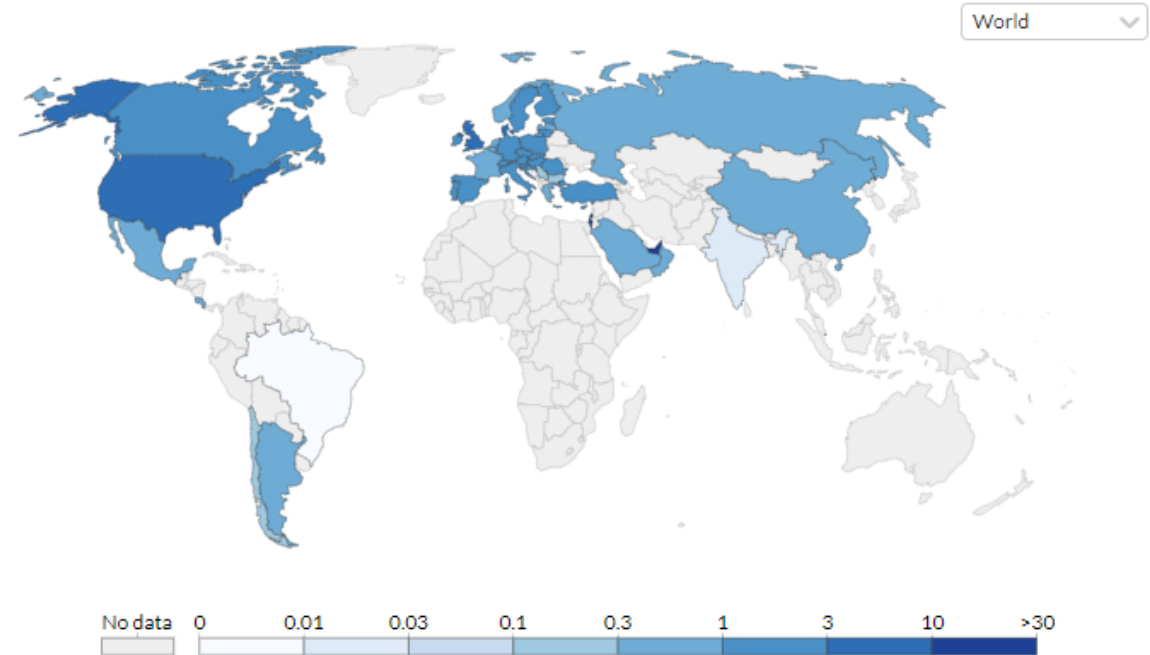

Note: This report is based on sources and information deemed to be true and reliable, but Dentons makes no representations to same.

COVID-19 Vaccine

As of January 19,
46.4 million people have
received one dose of
vaccine.

COVID-19 vaccine doses administered per 100 people, Jan 19, 2021
Total number of vaccination doses administered per 100 people in the total population. This is counted as a single dose, and may not equal the total number of people vaccinated, depending on the specific dose regime (e.g. people receive multiple doses).

COVID-19 Vaccine

The Covid-19 vaccine developed by BioNTech and Pfizer is likely to be effective against a rapidly spreading UK strain, per a laboratory-based study by the companies.

- India said it will provide domestically made **vaccines for free** to Bhutan, the Maldives, Bangladesh, Nepal, Myanmar, and Seychelles, with exports beginning as soon as today.
- Brazil's Fiocruz biomedical institute said it would not be able to deliver finished doses of a coronavirus vaccine developed by AstraZeneca until March due to a **delayed shipment of active ingredients** from China.
- South Africa and India argued for **IP rights for COVID-19 vaccines** to be waived at a closed-door WTO meeting.
- African countries will **pay between \$3 and \$10** per vaccine dose to access 270 million COVID-19 shots secured this month by the African Union.

Note: This report is based on sources and information deemed to be true and reliable, but Dentons makes no representations to same.

Markets

Oil rose above \$56 a barrel on Wednesday, supported by expectations the new US administration will deliver massive stimulus spending that would lift demand.

- **European stocks** rose on Wednesday after chip equipment maker ASML and Swiss luxury group Richemont gave encouraging earnings updates.
- **Asia-Pacific stocks** were broadly higher on Wednesday, following gains in the US after Treasury secretary nominee Janet Yellen backed quick approval of the incoming administration's relief package.
- **US stocks** rose Tuesday after Treasury Secretary nominee Yellen urged Congress to "act big" on stimulus. Yellen also used her confirmation hearing to warn US trading partners against currency manipulation.
- **Corporate bonds** have seen a strong start in 2021, driving key indicators to pre-pandemic levels.

Business

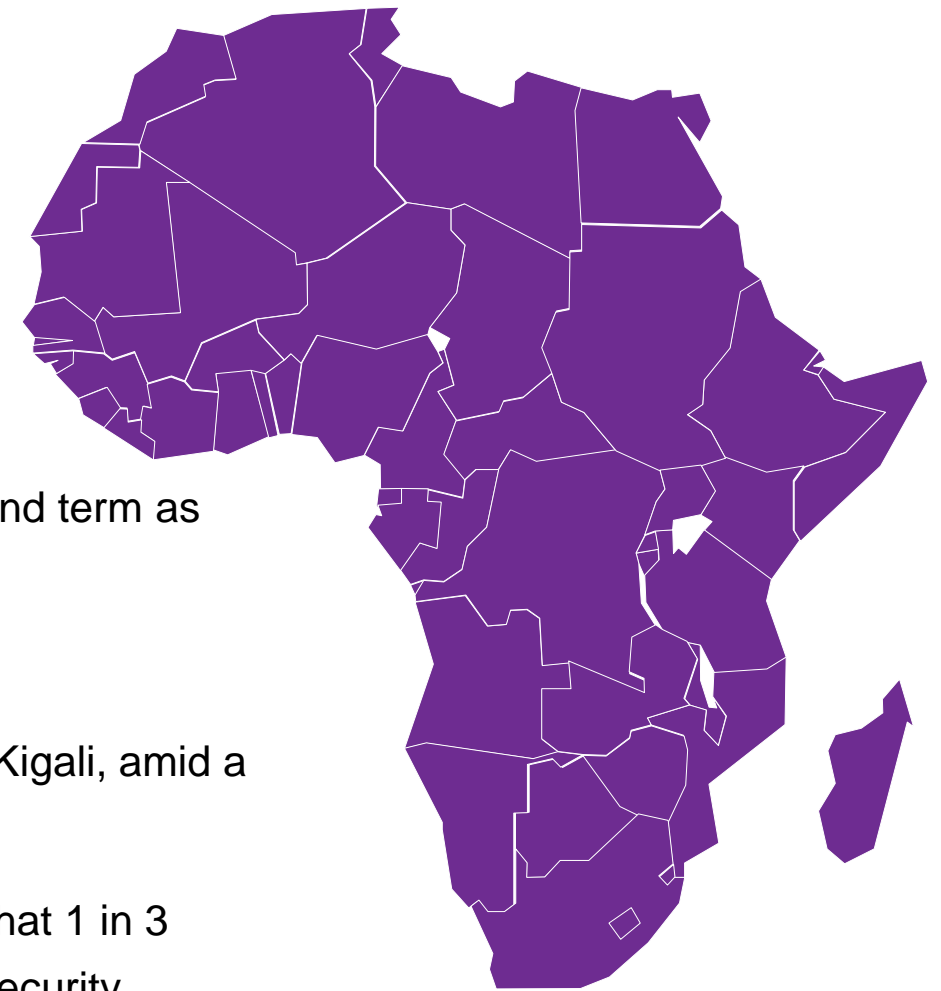

The COVID-19 pandemic has accelerated a shift by investors towards embracing corporate social responsibility, according to an S&P Global Ratings report.

- Bermuda-based **Axis** became the latest insurer to raise estimates for pandemic-related insurance claims.
- Colombia's majority state-owned oil company **Ecopetrol** has sold its 50 percent stake in **Offshore International Group** via a share purchase agreement with a subsidiary of De Jong Capital LLC
- **Tyson Foods** Inc agreed to settle price-fixing litigation with two more groups of plaintiffs accusing it of illegally conspiring to inflate prices in the \$65 billion chicken industry.
- **American Airlines** will resume new pilot hiring this year.
- **Netflix** will no longer raise debt to fund its spending spree on television shows and films and may begin returning money to shareholders through buybacks, marking a milestone in the company's evolution as it said it had passed 200 million subscribers.
- Italy's **Poste Italiane** signed an agreement with Hong Kong-based **Cloud Seven Holding Ltd** to buy a 51 percent stake in Chinese logistics company **Sengi Express**.
- British Airways and Iberia owner **International Airlines Group** has agreed to buy Spain's **Air Europa** for 500 million euros (\$606.7 million), after the pandemic cut the price in half.

Note: This report is based on sources and information deemed to be true and reliable, but Dentons makes no representations to same.

Africa

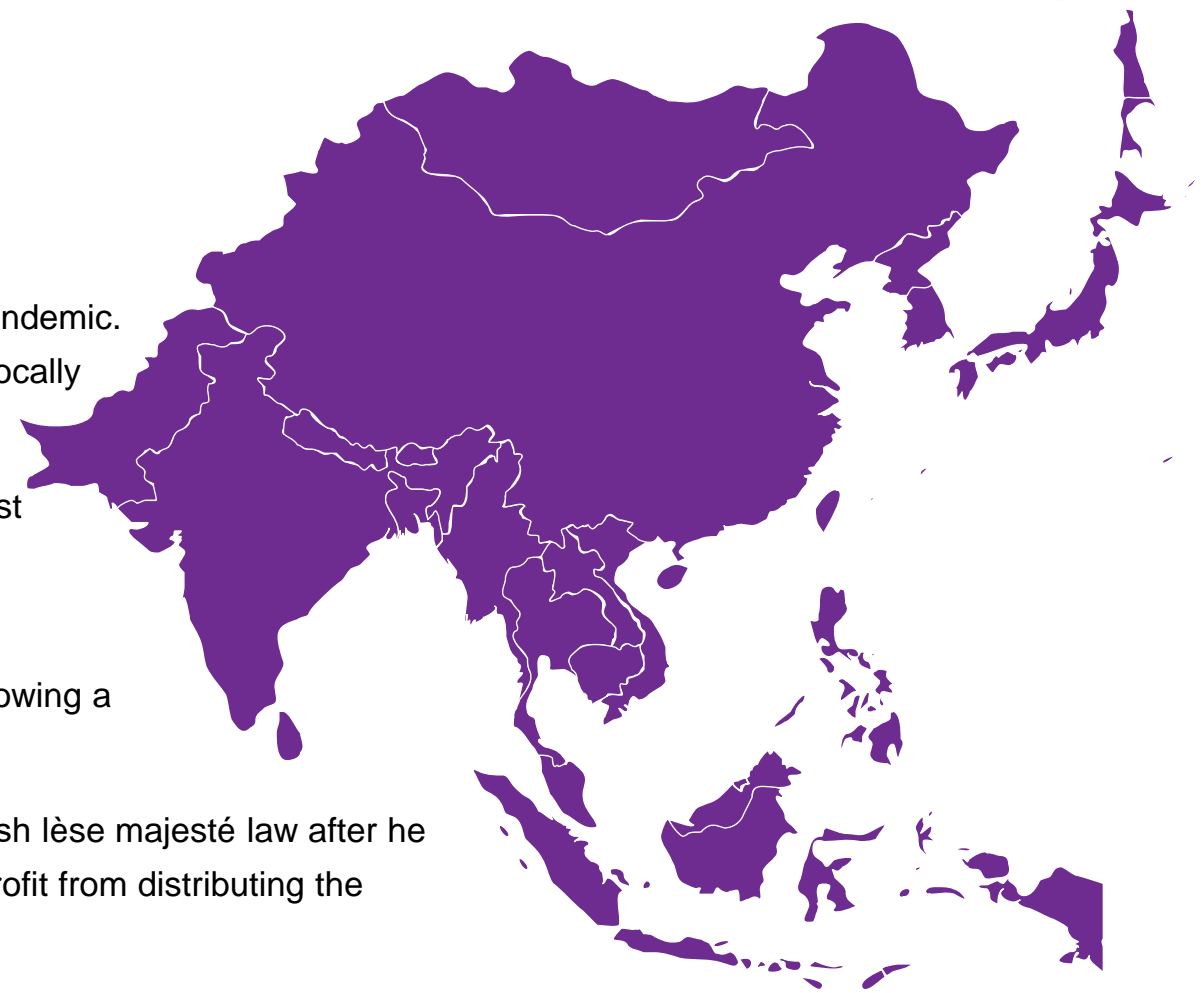

- **Uganda** restored internet services following a blackout during elections; social media remains blocked.
- Central African Republic President Touadera officially began his second term as opposition politicians and rebels refused to recognize the outcome.
- **Benin** President Talon announced his candidacy for a second term.
- **Rwanda** closed business and banned travel in and out of its capital, Kigali, amid a virus surge.
- The UN Office for the Coordination of Humanitarian Affairs reported that 1 in 3 people in southern **Madagascar** is now experiencing severe food insecurity.
- **Somalia** denied reports that Somali troops fought with **Ethiopian** troops in the Tigrayan conflict.

Note: This report is based on sources and information deemed to be true and reliable, but Dentons makes no representations to same.

Asia

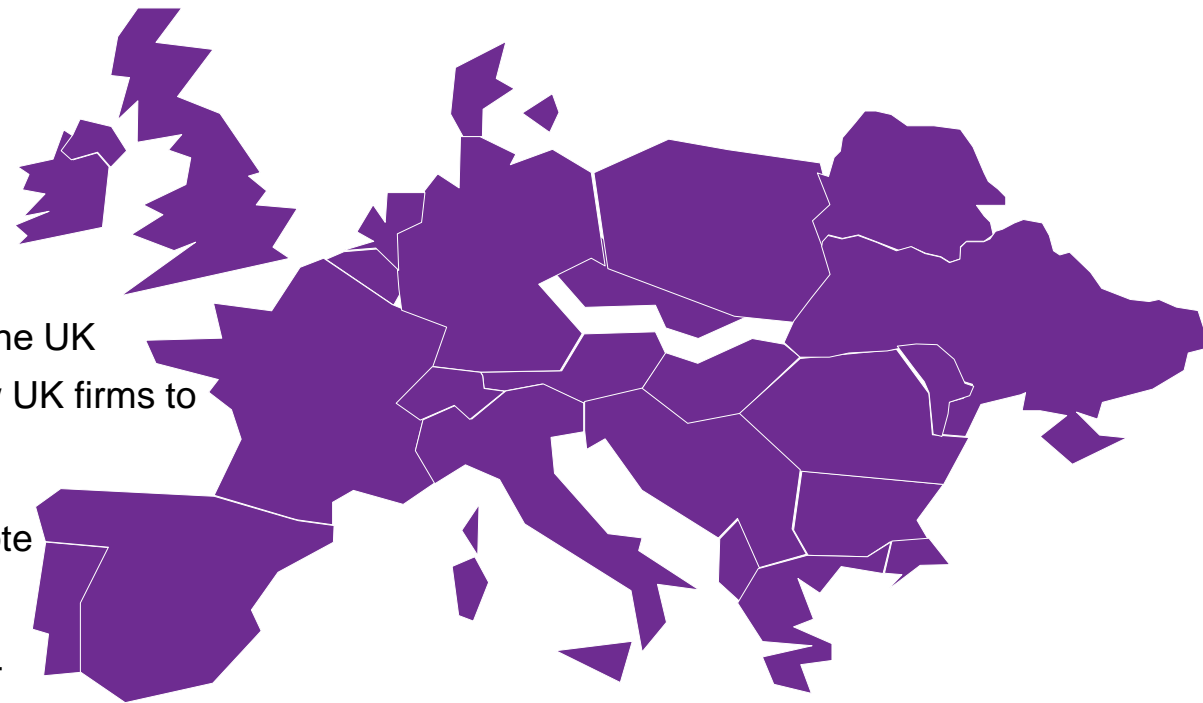

- **China** rejected criticism that it acted too slowly at the beginning of the pandemic. **Taiwan** canceled its Lunar New Year lantern festival after discovering 4 locally transmitted cases.
- The **US** determined that **China** is committing genocide and crimes against humanity in the repression of Uighurs in Xinjiang, making the US the first country to make such a designation.
- The **Japanese** prefecture of Okinawa declared a state of emergency following a case spike.
- **Thailand** will charge the country's leading opposition figure under its harsh lèse majesté law after he accused a company owned by King Maha Vajiralongkorn of seeking to profit from distributing the Oxford/AstraZeneca coronavirus vaccine.
- The **Indonesian** government introduced new regulations to fight violent extremism through empowerment training for civil society and community organizations.
- **India** asked WhatsApp to withdraw privacy policy changes that allow more collection of user data, saying they “*remove choice*” for Indian users.

Note: This report is based on sources and information deemed to be true and reliable, but Dentons makes no representations to same.

Europe

- The **EU** ambassador to the **UK** said Brussels is “*not punishing*” the UK financial sector by withholding regulatory rulings that would allow UK firms to serve EU customers.
- **Italy’s** Prime Minister Conte narrowly hung onto power after a vote of confidence that only passed due to 16 abstentions.
- **Russia** said it remained committed to extending the New START nuclear arms control treaty with the **US** and would welcome negotiations with the incoming Biden Administration.
- The **EU** announced a goal to vaccinate 80 percent of healthcare workers and people over 80 by March, and 70 percent of all people by June. The **UK** saw a record daily death toll of 1,610, bringing the country’s death toll higher than 90,000. A study by the UK’s Office for National Statistics found that 1 in 8 Brits had antibodies for the coronavirus in December. Scotland’s lockdown will be extended to mid-February. **Germany, Denmark and the Netherlands** extended national virus restrictions over concerns about the spread of the UK variant, B-117. Experience a strong surge in new infections, **Portugal** this week became the country with the highest seven-day average of new coronavirus cases per 100,000 inhabitants in the world. **European** airports asked the EU to loosen state aid rules amid the resurgence of coronavirus and travel restrictions.

Note: This report is based on sources and information deemed to be true and reliable, but Dentons makes no representations to same.

Middle East

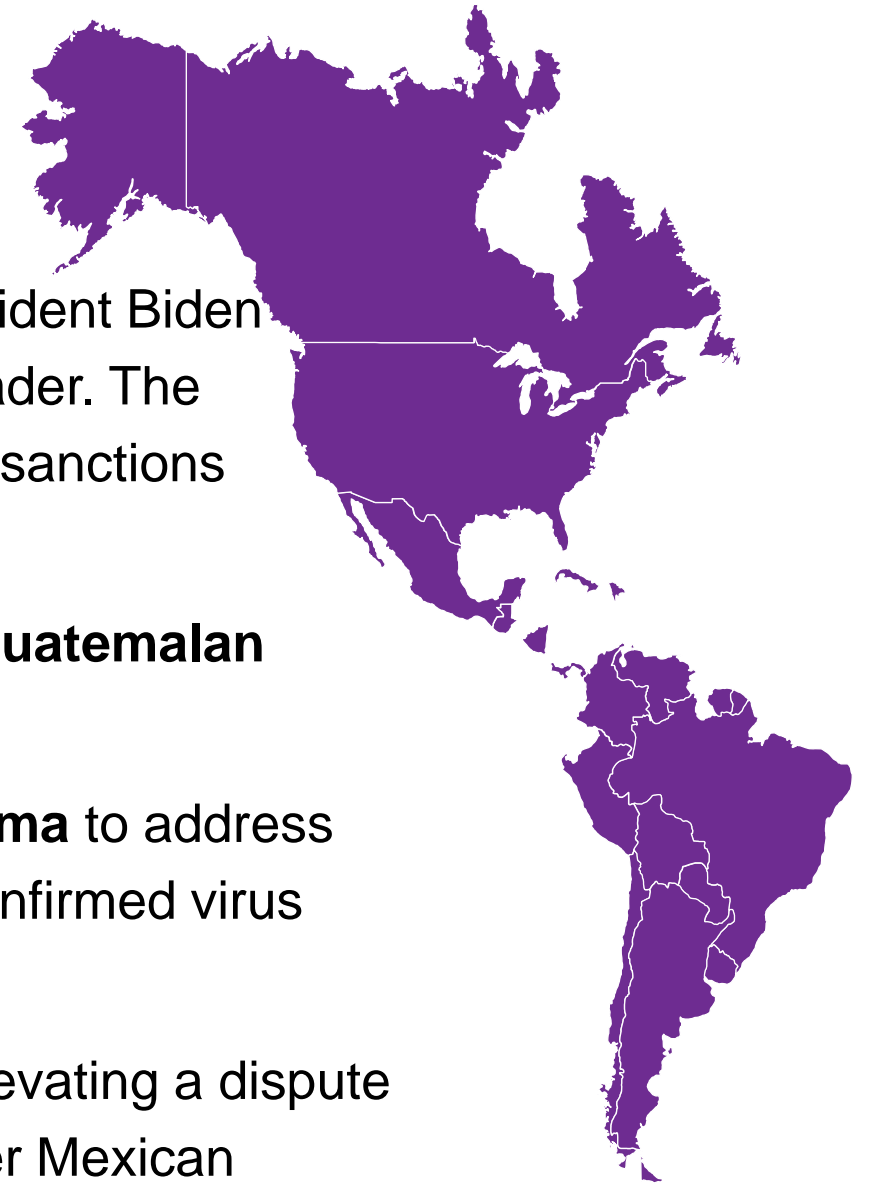

- **Syrian** state TV reported three explosions near the country's main oil refineries in Homs. Heavy rains in displacement camps in Syria killed at least one and displaced tens of thousands of people.
- The US exempted aid groups and the UN from its designation of the **Yemeni** Houthis.
- The death toll of three days of conflict in **Sudan's** Darfur region rose to over 100.
- **Qatar's** foreign minister called on **Gulf Arab** nations to engage with **Iran**.
- **Iran** blacklisted former **US** President Trump and other Administration officials for “*terrorist and anti-human rights*” acts in a symbolic move.
- **Iraq** delayed its elections again, from June 6 to October 10, citing time needed to organize the elections.
- **Tunisia** arrested hundreds of protesters after youth demonstrations against the recent reshuffling of the cabinet.
- **Bahrain** is expected to raise \$2 billion in a three-tranche bond sale on Wednesday after the coronavirus pandemic and low oil prices exacerbated its fiscal deficit and pushed total outstanding debt to nearly \$40 billion.
- **Saudi Arabia**, the world's biggest oil exporter, beat Russia to keep its ranking as **China's** top crude supplier in 2020,

Note: This report is based on sources and information deemed to be true and reliable, but Dentons makes no representations to same.

Americas

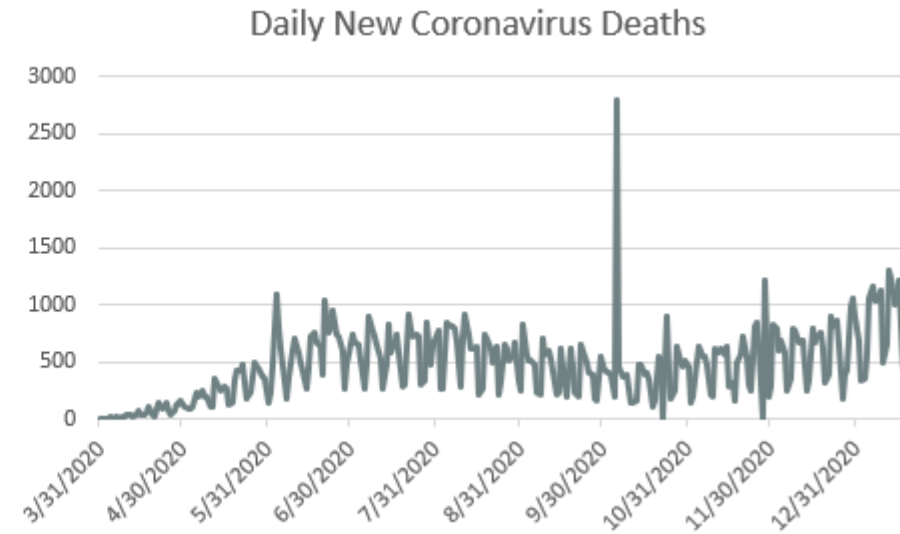

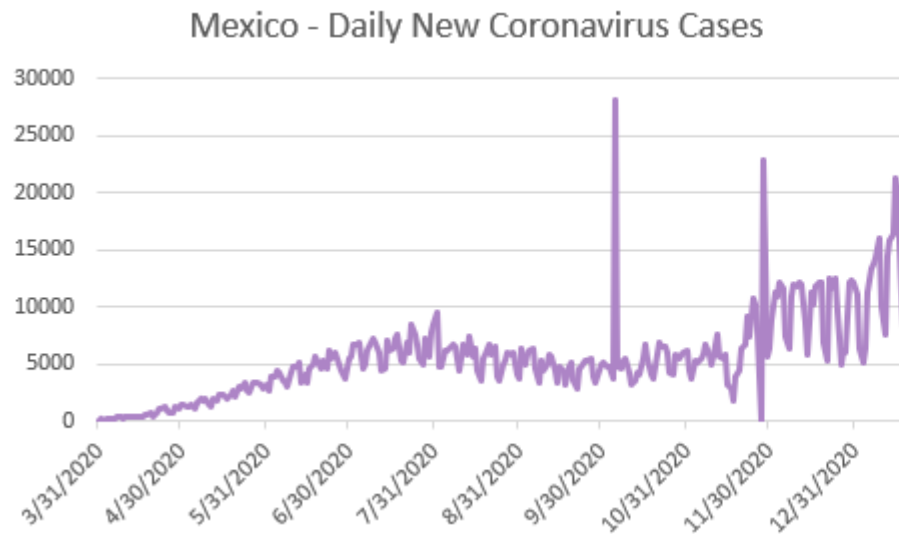

- Secretary of State Nominee Blinken signaled that **US** President Biden will continue to recognize Juan Guaidó as **Venezuela's** leader. The Trump Administration Tuesday announced a final round of sanctions on Venezuela.
- A caravan of **Honduran** migrants broke up in the face of **Guatemalan** security forces.
- The IMF has approved a \$2.7 billion line of credit for **Panama** to address the coronavirus pandemic. Panama surpassed 300,000 confirmed virus infections and 4,800 deaths.
- **Mexico's** attorney general said that he was considering elevating a dispute with the US over Mexico dropping charges against a former Mexican minister of defense to international courts.

Note: This report is based on sources and information deemed to be true and reliable, but Dentons makes no representations to same.

Americas

Mexico marked a grim milestone with 1,584 confirmed COVID-19 deaths on Tuesday, the country's highest daily total to date (excluding the October logging of back cases). Mexico has recorded more than 142,000 deaths, putting it 4th in the world behind the US, Brazil and India. Mexico has made arrangements to purchase the US/UK Pfizer--BioNTech, Chinese CanSino, Russian Sputnik V and British AstraZeneca vaccines, but the vaccination campaign is off to a slow start, under 500,000 inoculations so far.

Note: This report is based on sources and information deemed to be true and reliable, but Dentons makes no representations to same.

Americas: US

- Senate Maj. Leader McConnell (R-KY) said for the first time that the **January 6 mob** was “*provoked*” by President Trump. Two National Guard members have been removed from inaugural duty for links to **right wing extremist groups**. Trump issued 143 **pardons and commutations**, including former advisor Steve Bannon.
- **COVID-19 deaths** surpassed 400,000. The US has gone three days without any states reporting a record level of COVID-19 **hospitalizations**. Across the nation, 11.2 million have received the first dose of **vaccine**, covering 9.80 percent of the prioritized population and 3.40 percent of the total population. **Supply gaps** reported in additional jurisdictions, forcing more states to delay vaccination appointments.
- A **Florida** data scientist who was fired for posting conflicting data about COVID-19 cases in the state turned herself in on charges of illegally accessing health department data. **California** paused the distribution of the Moderna vaccine to investigate reports of allergic reactions. **New York** Gov. Cuomo said his state is facing a \$15 billion budget deficit and called for federal support.
- President-elect Biden’s nominees for Secretary of State, Defense Secretary, and Director of National Intelligence were vetted in Senate **confirmation hearings**. Today, Biden will announce rejoining the **Paris Agreement on Climate** and a sweeping order to review all of ex-President Donald Trump’s actions weakening climate change protections, the revocation of a vital permit for the **Keystone XL oil pipeline** project from Canada, and a moratorium on oil and gas leasing activities in the **Alaska National Wildlife Refuge** that Trump’s administration had recently opened to development.

Existing and Emerging Hotspots: Post-Election Unrest in Uganda, CAR and Niger

By Anni Coonan

Throughout the past month, a series of African elections have drawn international scrutiny following reports of violence, media crackdowns, and fraud.

While national governments and regional bodies have largely remained silent or endorsed the results of several elections, international observers and Western nations have condemned election-related violence and been rebuked for attempts to observe or certify the results - not to mention that the US has lost credibility in calling out post-election unrest after the events of recent weeks. Following an autumn election season that was marked with tumultuous election seasons in Guinea, Tanzania, the Ivory Coast, and more, violent protests in Nigeria, and a coup in Mali over the summer, the contested elections of the last month in Uganda, the Central African Republic, and Niger contribute to this destabilizing trend line. Of course, despite shared challenges posed by COVID-19, Islamist militants and worsening economic situations, each country has its own distinct political context; Ghana, which saw a peaceful, democratic transition of power in late December, and the Seychelles, which had elections in October, are recent examples of successful elections and transitions of power.

Uganda

In Uganda, a tumultuous campaign season concluded with the contested victory of 35-year incumbent President Museveni over youth-backed challenger Bobi Wine, a pop star turned politician. The months leading up to the campaign were marked by violent protests and clashes with the police - November saw the worst episode of election violence with more than 30 supporters of Wine killed, reportedly by police, and Western media has reported that Wine himself campaigns in a flak jacket. The campaign season concluded with Museveni's government shutting down social media and then the internet last week, ostensibly to prevent the spread of disinformation online or the incitement of violent protest. As of Monday, internet service has been restored, but social media remains offline, and Wine remains under de facto house arrest.

Note: This report is based on sources and information deemed to be true and reliable, but Dentons makes no representations to same.

Existing and Emerging Hotspots: Post-Election Unrest in Uganda, CAR and Niger

Election results show that Wine received about a third of the official vote tally, a ratio that he and his supporters call fraudulent. The validity of the election has been widely criticized: requests by the US to observe the election were denied, leading the US to warn that the polls would “*lack accountability and transparency*,” more than a dozen EU countries expressed their concern about media harassment and violence ahead of the vote; and a coalition representing Ugandan civil society organizations reported over the weekend that of the 1,900 requests it had filed to license election observers, only 10 were granted. Despite concerns about the validity of the results, it is unlikely that Wine’s party will be successful in challenging the election.

Although he will not become president, Wine now becomes the most powerful opposition leader in Uganda’s history after his National Unity Platform won a historic 60 seats. Although Museveni still holds a commanding majority of over 300 seats, Wine now controls several oversight committees and has decisively demonstrated the strength of his youth-oriented politics. Wine is the first Ugandan politician to translate youth grievances into real political power, and he can now claim to represent a growing share of voters - 77 percent of Uganda’s population is under 25 years old. A spokesman for the National Unity

Platform expressed optimism at the party’s increased influence, saying that challenging Museveni is “*like felling a tree. You keep cutting, chipping away until the tree falls.*”

The contentious election season has strained Uganda’s relationships with its Western allies, as Museveni has frequently alleged that Wine is supported by foreign donors and accused the US and Europe of meddling in its internal affairs. Museveni regularly refers to Wine as his “*foreign-backed*” opponent and blocked the US ambassador in Kampala from visiting Wine in his home on Monday, where he remains under de facto house arrest, accusing the ambassador of attempting to subvert the outcome of the election. This heightening of tensions puts the US and other allies in a delicate position: the US is deeply

Fact Box: Uganda

- Active Cases: 24,824
- Confirmed Cases: 38,534
- Deaths: 205
- Population: 44.27 million
- GDP: \$33.93 billion (2020)
- GDP per Capita: \$823 (2019)
- Global Health Security Index: 63 (out of 195)

Note: This report is based on sources and information deemed to be true and reliable, but Dentons makes no representations to same.

Existing and Emerging Hotspots: Post-Election Unrest in Uganda, CAR and Niger

invested in equipping and training the Ugandan military, and Uganda supplies the largest share of fighters against al-Shabaab in Somalia. The election violence has led some US lawmakers and officials to call for tying US aid to Uganda - which reached \$1 billion in 2020 - to progress on democratic values, while opponents to that strategy argue that reducing aid could alienate Kampala and threaten progress in Somalia.

Central African Republic

Meanwhile, to the west, the Central African Republic (CAR) is also reeling from a tumultuous campaign season marred by concerning election-related violence. In late December, Central Africans reelected the incumbent, President Touadera, for his second term, overcoming threats and direct attacks by rebels linked to the former President Bozize, a militant leader who ran the country prior to Touadera and who was formally disqualified from the race in the autumn on “*moral grounds*,” referencing his involvement in war crimes in CAR’s last civil war. Militants that Touadera and the UN have linked to Bozize

undertook multiple attacks in rural areas as an attempt to destabilize the government and force the election to be postponed or cancelled. The violence caused some 115,000 Central Africans to leave their homes in December, and while many have returned as the violence has calmed, the UN estimates that 62,000 remain displaced. Although the election went about as smoothly as could be expected, CAR still faces intense militant violence, widespread internal displacement, an economy that is among the world’s least developed, and a COVID-19 outbreak that has gone mostly un-tracked. While violence has calmed somewhat since the conclusion of the elections, the unrest has necessitated an increased peacekeeper presence and observers worry that violence may resurge.

Fact Box: CAR

- Active Cases: 25
- Confirmed Cases: 4,973
- Deaths: 63
- Population: 4.75 million
- GDP: \$1.8 billion (2020)
- GDP per Capita: \$370 (2019)
- Global Health Security Index: 159 (out of 195)

Note: This report is based on sources and information deemed to be true and reliable, but Dentons makes no representations to same.

Existing and Emerging Hotspots: Post-Election Unrest in Uganda, CAR and Niger

Niger

Following an orderly election late last month, Niger is scheduled for a runoff election in February after no candidates succeeded in earning the necessary 50 percent of votes. The country hopes that the election process will end in Niger's first democratic transition of power; the incumbent, two-term President Issoufou, is demonstrating his commitment to term limits and voluntarily stepping down. Currently, it seems likely that the ruling party candidate, Bazoum, will garner more votes than his opponent, a former Nigerien president who deposed in 1996, and the government will continue to be led by the popular ruling party. Despite heartening signs, the transition is a delicate time for the country. The incoming president will inherit persistent militant attacks spilling over from the country's western borders with Mali and Burkina Faso, extreme poverty, and widespread corruption.

Fact Box: Niger

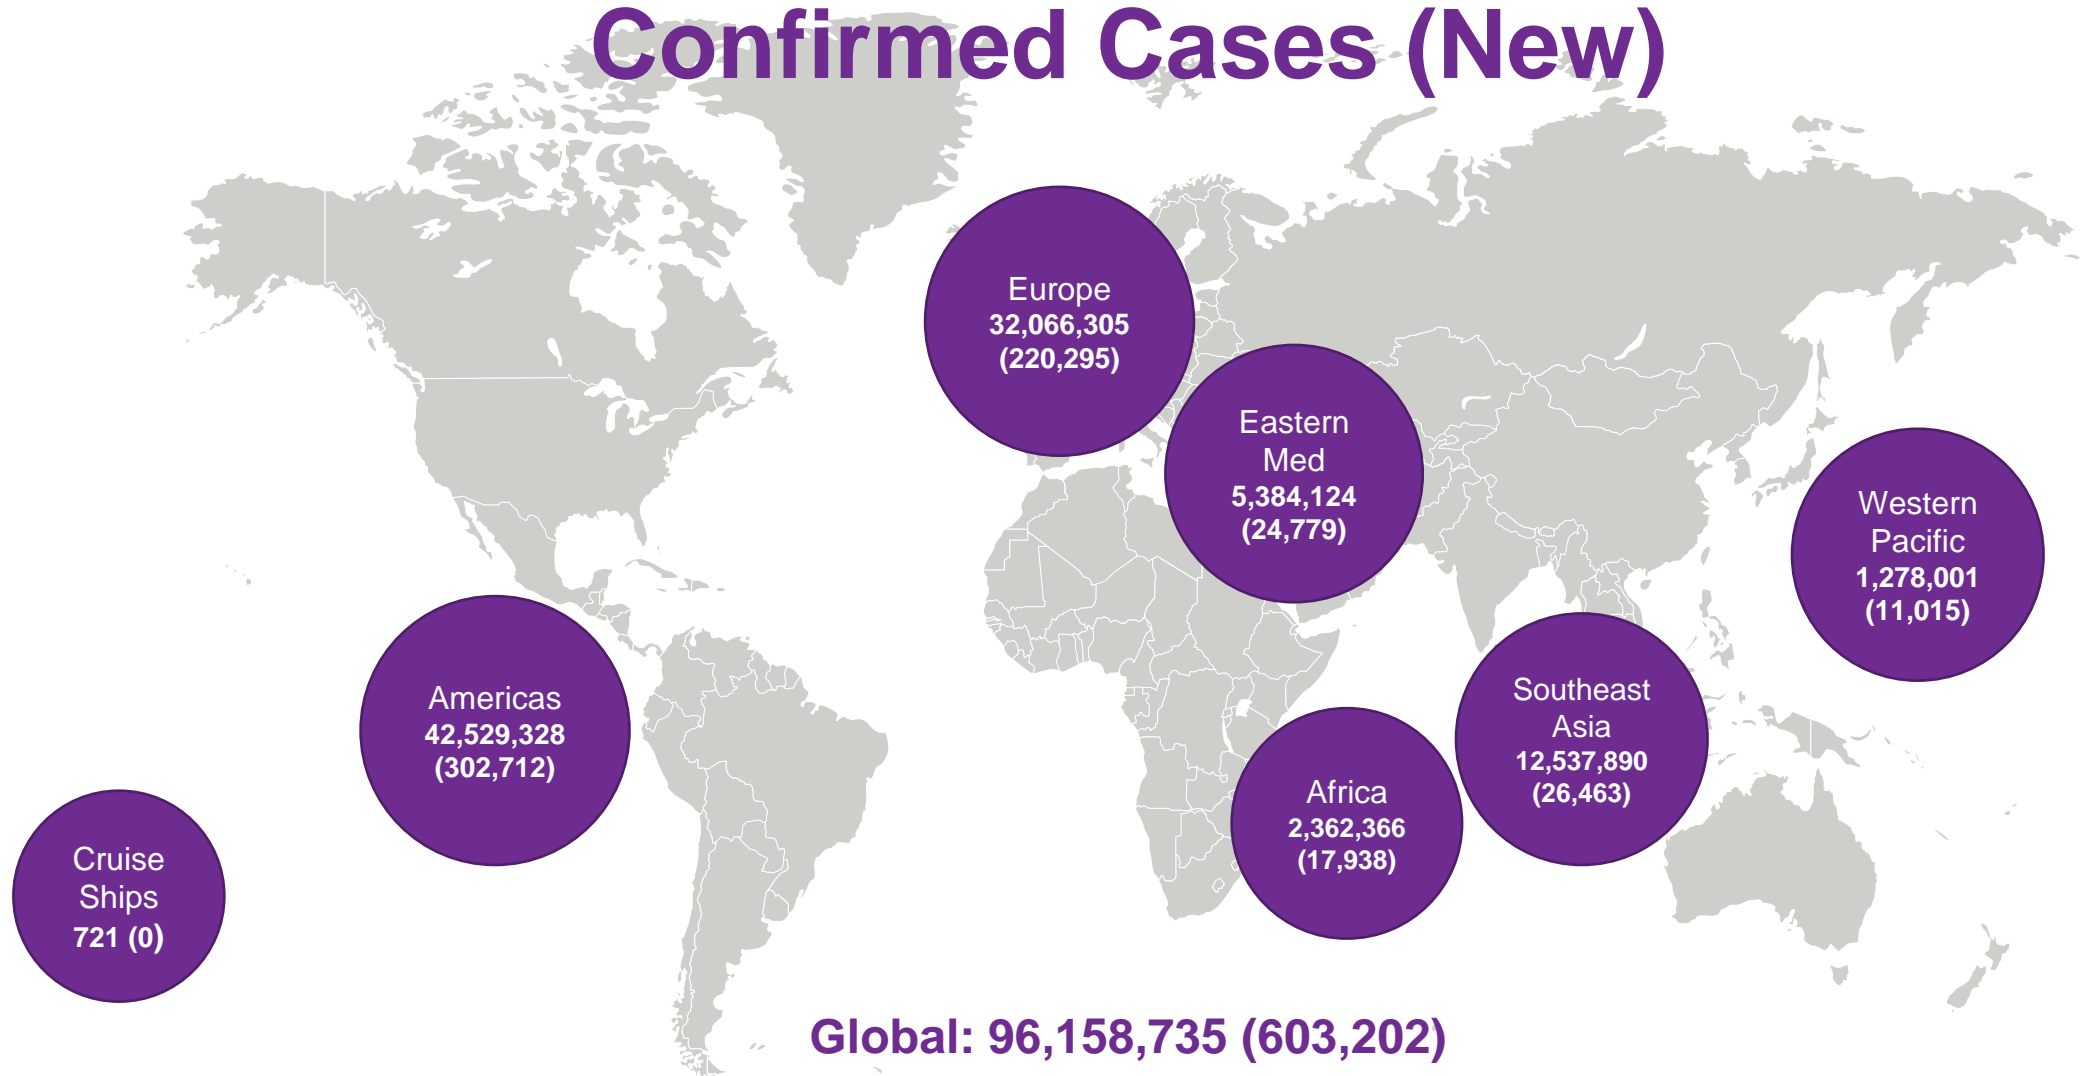

- Active Cases: 814
- Confirmed Cases: 4,225
- Deaths: 146
- Population: 23.31 million
- GDP: \$10.8 billion (2020)
- GDP per Capita: \$485 (2019)
- Global Health Security Index: 132 (out of 195)

Note: This report is based on sources and information deemed to be true and reliable, but Dentons makes no representations to same.
