

Eurozone Hub – Navigating Eurozone regulation, supervision and monetary policy

大成 DENTONS

Banking Union, Capital Markets Union, BREXIT and Eurosystem monetary policy are all changing the way business is structured, booked, executed, custodied, reported, provisioned and supervised across the EU 27 and the Eurozone 19. In addition to new requirements, the dynamic of rulemaking and also who sets the tone of supervisory engagement across the EU's Single Market for financial services is being driven increasingly at the EU and Eurozone level rather than by national authorities.

This requires a new approach and solutions on identifying and managing risk, compliance and strategic opportunities both for firms in the EU 27 and the Eurozone 19 and those relocating.

In response, our dedicated Frankfurt based Eurozone Hub supports Dentons' wider Eurozone Group and provides clients with integrated assistance when seizing opportunities and staying ahead of the curve.

■ What we do and how we can help you

The process of who makes rules and supervises compliance across the EU and in particular the Eurozone is being increasingly led by European authorities as opposed to by national authorities in the Member States. In response to this “Europeanization” our Frankfurt based “Eurozone Hub” together with the wider “Eurozone Group” brings together our local-market insight and capabilities with specialist EU and Eurozone regulatory, monetary policy and transaction expertise.

The Eurozone Hub and the Eurozone Group’s integrated and cross-functional set-up means that clients benefit from:

- Access to regulatory and transactional specialists, deep local insight and our access to national authorities in each market; coupled with
- Our dedicated Eurozone Hub, providing EU and Eurozone specialist experience as well as access to the ECB and the European Supervisory Authorities (European Banking Authority, European Securities and Markets Authority and the European Insurance and Occupational Pensions Authority), provides efficiency in the management of client specific and system-wide developments affecting stakeholders as well as the breadth of “change the business”, “run the business” and the requisite “BREXIT proofing” workstreams that are reshaping business.
- We understand how technology changes the banking, funding and insurance space through blockchain, data analytics, FinTechs and InsurTechs and we know how to bridge the gap between technology, processes and law.

Our Eurozone Hub in Frankfurt works closely with **Dentons’ Brussels based EU Law & Policy Team**, which advises inter alia the **European Commission and European Parliament** on various legislative instruments shaping the future of the EU and its Single Market for financial services.

■ Providing ongoing advice in regulatory matters in the Eurozone

Our Eurozone Hub can deliver value to you by solving regulatory issues and using regulation to your advantage. We focus on providing ongoing advice in regulatory matters and on supporting you in deals and litigation with a regulatory angle.

We design, structure and implement new or evaluate existing regulatory capital instruments.

We advise on acquisitions and divestitures of regulated businesses.

We help clients participate and shape the debate amongst policymakers by representing needs of clients.

We help clients navigate challenges and seize opportunities where there are conceptual divergences in law or regulation.

We help clients when faced with supervisory examinations, thematic reviews, sanctions or otherwise to “defend files”.

We cover all regulatory topics at both the EU and at national levels and across all relevant rulebooks.

We help financial institutions during investigations from national and EU level regulators/supervisory agencies.

We lead on financial services license applications and other regulatory approvals.

We are fully familiar with the financial supervisory culture and expectations at every level across the Eurozone-19, EU-27, the UK and the differences to other global jurisdictions.

We deliver workable solutions to address all “hot” key regulatory topics under global, EU and national rulebooks such as compliance, governance, risk management and cyber security.
