Daily Global Situation Report

October 14, 2020

Global Situation Update: October 14, 2020

KEY TAKEAWAYS

The total value of China's stock market has climbed to a record high of more than \$10tn.

Eli Lilly pauses trials of its antibody treatment.

China, Russia and
Cuba gain
controversial seats at
the UN Human Rights
Council.

Global

Overnight, confirmed coronavirus cases rose to 38,406,711 in 214 countries and territories, with 1,091,593 deaths.

- Eli Lilly paused trials of antibody treatment "out of an abundance of caution." The Lilly trial is the third late-stage clinical trial for coronavirus vaccine or treatment to be paused due to complications; Johnson & Johnson's vaccine trial paused earlier this week, and AstraZeneca's trial has been on hold since early September.
- WHO chief Ghebreysus called efforts to reach herd immunity "simply unethical."
- A Japanese supercomputer showed that humidity can have a large effect on the dispersion of virus particles, pointing to heightened coronavirus contagion risks in dry, indoor conditions during the winter months.

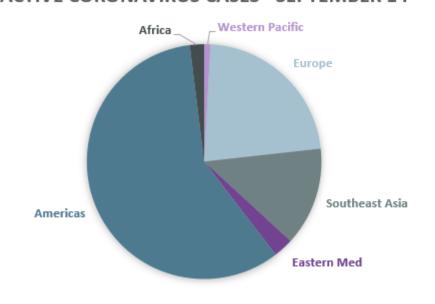

- The IMF warned that the COVID-19 pandemic could cost \$28trn in global economic losses in the six years leading up to 2025 and cause "lasting damage" to people's standards of living throughout the world; the Fund warned that taxes on the rich and corporations may need to rise.
- China, Russia, and Cuba gained controversial seats at the UN Human Rights Council; Saudi Arabia lost its election to China.
- Vaxart began early-stage study testing of its oral tablet
 COVID-19 vaccine.

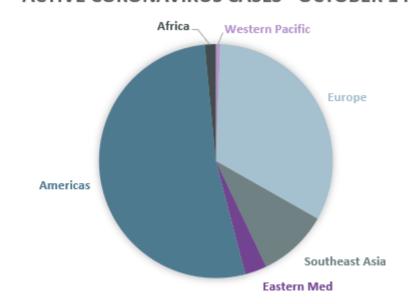

Global

Over the past month, the locus of active coronavirus cases remained in the Americas, with Europe gaining in second place.

ACTIVE CORONAVIRUS CASES - SEPTEMBER 14

ACTIVE CORONAVIRUS CASES - OCTOBER 14

Source: Johns Hopkins University

Markets

OPEC cut its 2021 oil demand forecast as COVID-19 cases rise.

- European shares headed lower on Wednesday after tumbling in the previous session over a halt in COVID-19 vaccine trials and uncertainty over more U.S. stimulus.
- Asian equities also were toppled by stalled vaccine trials.
- The global stock market rally faltered
 Tuesday on worsening pandemic forecasts
 and a bleak IMF economic outlook.

- Invesco's chief global market strategist said that markets have become a "voting machine" based on pandemic numbers, polls, vaccine developments, and stimulus prospects.
- US consumer price growth increased in September for the fourth consecutive month.
- The total value of **China's stock market** has climbed to a record high of more than \$10tn.

Business

Facebook said it would ban ads discouraging vaccines.

- JPMorgan reported \$29bn in revenue for Q3, a slight dip from 2019 but still leading Wall Street earnings. Both Citigroup and JPMorgan made twice as much in Q3 as in Q2. BlackRock's Q3 profits rose 22 percent.
- Delta Air Lines posted \$5.4bn in losses in Q3;
 Delta's chief warned that the recovery in business travel would take at least two years.
- Malaysia's government approved a \$242m lifeline loan to AirAsia Group.
- AMC warned that it could run out of cash by the end of the year.

- Apple's live stream launch was blocked by Chinese online video platforms.
- US activists urged corporate data disclosure to ensure accountability on **diversity pledges**.
- Top institutional shareholders in Procter & Gamble have thrown their weight behind a call for it to do more to protect forests as an environmental wave confronts the world's largest consumer group.
- Chicken giant Pilgrim's Pride said it has agreed to a plea deal with the US Justice Department to resolve price-fixing charges and will pay a fine of \$110.5 million.

Africa

 All Nigerian schools reopened. Nigerian protesters gathered to protest police brutality for the sixth straight day.

- Rwanda approved the production and export of cannabis for medical and recreational uses.
- Mozambique's health minister tested positive for the coronavirus.
- Suspected Islamist militants killed 25 people, including 13 soldiers, in attacks on central Mali.

Asia

Nearly 40 people have died in floods in Southeast Asia.

• China's exports and imports both surged in September on recovering domestic and international demand. China's People's Liberation Army tested a new anti-tank missile in an island-landing drill that analysts say was aimed at Taiwan; President Xi visited a military base on his tour of southern China, telling marines to improve combat readiness.

 Infrastructure buildup on both sides of the disputed India-China border has been described by analysts as an "infrastructure arms race" as each side seeks to bolster tactical advantages.

- For the first time since March 25, migrant worker dormitories in **Singapore** produced no new COVID-19 cases.
- Hundreds of Thai protestors clashed with police after 21 of them were arrested.
- Indian authorities freed a top Kashmiri politician after over a year in detention. Sources report that the

Europe

- The rebound of the eurozone's manufacturing sector lost much of its momentum in August, as industrial production grew at its slowest rate for four months.
 Ireland unveiled a record budget proposal of nearly €18bn for 2021 in a bid to combat a severe coronavirus recession.
- Cyprus will suspend its controversial "golden passport" pathway to nationality for wealthy foreigners.
- The **German** population shrank for the first time in a decade this year due to the pandemic's impact on immigration.
- A far-right **Slovak** leader, Marian Kotleda, was sentenced to 4 years in jail after making a neo-Nazi reference.
- Moscow will respond in kind against European Union sanctions over the case of Kremlin critic Alexei Navalny, Russian Foreign Minister Sergei Lavrov said. A Russian Soyuz spacecraft carrying a US astronaut and two Russian cosmonauts blasted off from the Baikonur cosmodrome in Kazakhstan.
- Portuguese soccer star Cristiano Ronaldo tested positive for the coronavirus. The Netherlands imposed a partial lockdown in response to its rising infection rate. UK Labour leader Starmer urged PM Johnson to impose a "circuit breaker" lockdown to prevent the NHS from being overwhelmed. Liverpool is struggling with a surge in cases; 95 percent of intensive care beds in the city's main hospitals are full. Ukraine called for schools and universities to be closed as cases spike. Poland's PM tested negative after going into quarantine due to exposure. Russia's cases rose by a new daily record of 13,690. Sweden surpassed 100,000 virus cases and Bulgaria, 25,000.

Middle East

The UAE recorded a record daily case rise of 1,315 cases; the country's positivity rate also rose to 1.4 percent, up from an average 1 percent.

 Historic Israel-UAE commercial flights will be delayed until January due to rising COVID-19 numbers.

 Tunisian protesters clashed with police after authorities in Sbeitla killed a man while demolishing an illegal kiosk in which he was sleeping.

• The US FBI said it reached no firm conclusion on what caused the August 4 explosion in Beirut, **Lebanon**.

• **Iran's** death toll from the coronavirus pandemic may be more than double the official figures in some provinces as missed tests or mis-testing leads to inaccuracies, a deputy health minister said.

Americas

• Mexico signed deals with AstraZeneca, Pfizer, and CanSinoBio to precure enough COVID-19 vaccines for 116 million people in 2021. At least 14 suspected gunmen were killed and three police officers wounded in a massive shootout in northern Mexico. Mexican authorities have frozen 1,352 bank accounts that allegedly moved around \$125m for 14 crime gangs. Internal weaknesses in President Lopez Obrador's Morena party, which he created to win the presidency, are threatening to undermine his Administration.

- Democratic staff of the US Senate Foreign Relations Committee found that US immigration agents in Guatemala violated their terms of funding by helping deport Honduran migrants earlier this year.
- Venezuela is increasing coal exports to Europe as the US escalates sanctions on oil.

Americas: US

- Confirmation hearings for Amy Coney Barrett for the Supreme Court continued for the second day; central topics included potential rulings on abortion, the ACA, and the election.
- Seven states set new seven-day average case records on Tuesday for the second day in a row: Indiana, Illinois, West Virginia, Minnesota, North Dakota, South Dakota and Ohio.
 Wisconsin reported a record daily infection and death rise.
- **Virginia's** governor was among the targets of the group arrested for attempting to kidnap **Michigan** governor Whitmer.
- As **early voting** begins throughout the country, voters throughout the South are facing wait times up to 12 hours. Early voting in key battleground states is already exceeding 2016 levels.
- Majority Leader McConnell said the Senate would vote on narrow **stimulus** for small businesses next week.
- The Supreme Court ruled to allow the Trump Administration to halt census counting early.
 U.S. drug inspectors uncovered serious quality control problems at an Eli Lilly and Co pharmaceutical plant that is ramping up to manufacture one of two promising COVID-19 drugs.

Emerging & Existing Hotspots: Kyrgyzstan

By Alex Lucaci

Kyrgyzstan, an energy-rich Central Asian nation on China's western border, has been undergoing a period of significant turmoil since its parliamentary elections on October 4. Amid widespread allegations of corruption and electoral fraud, the country's central election commission annulled the results of the election, in which only political parties aligned with the incumbent president passed the threshold to win seats in parliament.

Since then, mass protests supported by the various opposition parties have erupted in the capital, Bishkek, creating a power vacuum and plunging Kyrgyzstan into a state of political chaos - a dangerous development in what is considered to be Central Asia's only democracy.

Since the election, embattled Kyrgyz President Sooronbai Jeenbekov has declared a state of emergency in Bishkek while also ordering state troops to put down the opposition groups forming on the streets. Reporting indicates that hundreds of protestors have been injured, with one reported death. This past Saturday, an agreement was reached to appoint Sadyr Japarov as prime minister, a man who had been recently sprung from prison where he was serving a lengthy sentence for the 2013 kidnapping of a regional governor. It is unclear whether Japarov will have legitimacy as Prime Minister among opposition groups wary of his hardline rhetoric and connections to organized crime. It is also unclear whether he will serve a full term as prime minister or be forced to leave the post once new parliamentary elections are held. In either case, tensions remain high among the top levels of Kyrgyzstan's leadership, who oftentimes jail political rivals and predecessors depending on who is in power.

Kygyrzstan

- Active Cases: 4.067
- · Confirmed Cases: 49,871
- Deaths: 1,092
- Population: 6.4 million

- GDP: \$8.4 billion (2019)
- GDP per Capita: \$1,309 (2019)
- Global Health Security Index: 47 (out of 195)

Emerging & Existing Hotspots: Kyrgyzstan

The uncertainty surrounding Kyrgyzstan's political leadership is creating a regional security crisis for major powers in the region. As a former Soviet republic, Kyrgyzstan has traditionally been close to Russia, which maintains a large air force base on the country's eastern border with China. At the same time, Beijing has ramped up their economic diplomacy with Central Asia over the past several years, underwriting billions of dollars of development loans and energy investments as part of the Belt and Road Initiative. This investment will be increasingly important going forward, as Kyrgyzstan announced the suspension of SWIFT on October 7 to prevent further capital outflow during this period of instability. Statements coming out of the Kremlin indicate that President Putin and Russia's security services are closely monitoring developments in Kyrgyzstan - the two countries are bound by a Collective Security Treaty Organization, although it remains unclear where the power centers in Bishkek lie. Kyrgyzstan's security chief was removed from his position days after fielding an emergency call from Alexander Bortnikov, the head of Russia's FSB security service. This may be a sign that the eventual new leadership in Kyrgyzstan is looking to separate itself from Moscow and align more closely with Beijing. At the same time, Beijing is signaling that the continuing unrest is

disincentive for future Belt and Road investments in the Kyrgyz energy and rare earth mineral sectors.

Currently, Moscow is facing a slew of geopolitical challenges in its sphere of influence and is unlikely to let Bishkek drift out of its orbit so easily. If Russia feels as though the instability in the country begins to present a real threat to its power projection in Central Asia, this will provoke a strong reaction from the Kremlin. Compounding Russia's problems in Kyrgyzstan are several additional smoldering crises on their borders, including the military violence in Nagorno-Karabakh, political unrest in Belarus, and the frozen conflict in eastern Ukraine. Despite President Putin's projections of confidence on the world stage, Moscow's strategic capabilities and foreign expenditures are being stretched as they play geopolitical "whack-amole" in their near abroad. Furthermore, Russia is now dealing with a resurgence in COVID-19 cases and has registered a record number of case increases over the past several days. In the short to medium term, Moscow will struggle to balance between domestic responsibilities arising from a sluggish economy and public health crisis, while also achieving security solutions to the ongoing crises on its borders.

Country in Focus: Sweden

Sweden has long been the black sheep of the coronavirus pandemic. As the virus set in in March, Sweden broke from its neighbors (and WHO advice) in not locking down its country, and since then, Sweden's approach to the virus has been notably lax. Seven months after the onset of the pandemic, we can look back on the successes and failures of the Swedish model, and look ahead to the country's second wave strategy.

Restaurants never closed, and students under 16 remained in school. Until recently, the Swedish health authority advised that it was nearly impossible for asymptomatic positives to infect other people, meaning those people did not have to self-quarantine or notify close contacts. The government continues to discourage mask usage, saying that evidence that they are effective is mixed, they can cause panic, and they actually reduce social distancing by instilling a false sense of security. Sweden's approach won it fans among anti-lockdown protesters throughout Europe and the US, and top aides in the US have even advocated the Swedish model to the President.

Sweden's original approach was neither the success it appeared, nor exactly as relaxed as it was interpreted. First, the unorthodox social distancing rules came with a devastating death toll: Sweden's death rate is nearly ten times that of many of its neighbors, and its

rate of deaths per million nears that of the US. Immigrant communities, especially Somalis and Syrians, were hit especially hard. Children were also not spared, despite Sweden's reliance on the theory of low transmissibility in children to keep schools open. Although no official data on child infection has been published, Swedish hospitals reported 15 children admitted for severe COVID-19 and over 70 for inflammatory complications, compared to one and less than five, respectively, in Finland.

Sweden

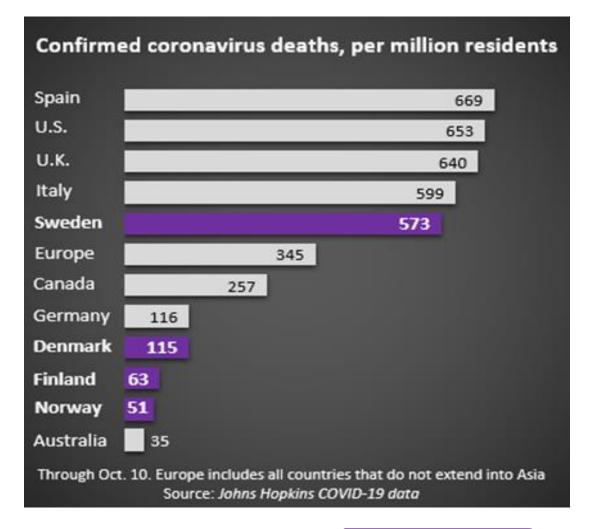

- Active Cases: 94.755
- Confirmed Cases: 100,654
- Deaths: 5,899
- Population: 10.23 million
- GDP: \$530.83 billion (2019)
- GDP per Capita: \$57,975 (2019)
- Global Health Security Index: 21 (out of 195)

Country in Focus: Sweden

The strategy also did not appear to spare the economy, which many officials and observers cited as a goal of the plan: Sweden's economic output shrank by 8.3 percent in the second quarter, the worst of any Nordic country, which analysts point to as proof that large outbreaks are bad for business, regardless of the official rules. At the same time, life in Sweden was not as un-restricted as press coverage often made it appear: although most businesses remained open, many Swedes chose to remain home, and movement in Sweden reduced to levels similar to those of other Nordic countries. according to cell phone data tracked by Google Mobility Reports. Absent mandatory distancing rules, Swedes chose to isolate to a certain extent, although public health officials - including an opposition party of Swedish scientists that call themselves the Vetenskapsforum COVID-19 - say that this self-selection was not sufficient to curb transmission of the virus, especially without mask rules.

The Swedish government has acknowledged fault on some issues: it regrets March advice prohibiting long-term care workers from wearing masks and gloves because it might scare patients, and has revised its advice on asymptomatic cases. However, the government - led by top doctor Anders Tegnell - has largely stood by

Country in Focus: Sweden

the strategy. To their credit, Sweden thus far appears to be escaping the second wave battering parts of Europe - although if seven months of the pandemic has revealed anything, it is that even the most robust success stories are not invincible to outbreaks or slip-ups. As the weather turns and European hotspots persist, Sweden will likely experience another wave of its own.

Looking forward, Sweden is taking the unique approach of prioritizing sustainability over clamping down on virus transmission. They are maintaining some of their more controversial rules: masks, for example, are still not required. If a positive case is detected, the whole household must quarantine, but schoolchildren are exempted, and quarantine is only required for 5-7 days - as opposed to the 14 ubiquitous throughout the world and recommended by the WHO. Sweden points to a body of research that suggests transmission is rare in the second week after infection, and also that two weeks of isolation - even with family - is draining and psychologically damaging. "Compliance fatigue" is a serious concern in countries facing drawn-out outbreaks, and the Swedish model attempts to balance safety with sustainability so that the population does not tire of the restrictions prematurely. As the pandemic nears its eighth month, and experts estimate that

vaccines will not be widely available until spring or summer of 2021, longevity is a worthy goal. The Swedish government, led by Tegnell, has clearly decided that a larger outbreak is worth the trade-off in sustainability. Leaders throughout the world are grappling with this choice in other ways: throughout Europe, governments have largely turned to regional lockdowns, avoiding the oppressive and economically damaging lockdowns of the spring. While the Swedish approach clearly lost out to other Nordic countries in the short term last spring, its effect remains to be seen over the coming months of the pandemic.
